Teach, Check, Respond

Session 1 — Fractions, Decimals, Percents · Session 2 — Compare and Order · Maryland 6.AT.4

LESSON ROUTE

about 45 minutes per session

Warm up · 5 min	Warm-Up page (Session 1). Note who needs the prerequisite sheet.
Launch · 7 min	Slides: name the target. Students predict an answer to the Model, Reason, Explain task.
Model · 10 min	Guided Notes page for the session. Draw the deck's model next to the worked example.
Practice · 18 min	Practice Form A: core #1, #2, #4, #6 and Find the Error. Add more from what you see.
Check · 5 min	Exit Ticket. Sort into got it / almost / need help with the table below.

Shorter period: keep the model and the exit ticket; trim practice. Form B is for reteach or retake, so keep it unseen until then.

SESSION 1 · FRACTIONS, DECIMALS, PERCENTS *I can write the same value as a fraction, a decimal, and a percent.*

EXIT TICKET – WHAT TO LOOK FOR AND WHAT TO SAY NEXT

#	Expected answer	Next prompt if it is not there yet
1	a. 9% b. 65%	Write 0.9 and 0.09 as percents. Explain why they are different.
2	a. 18/25 b. 0.72 c. 72% (18/25 = 72/100)	Ming answered 22 of 25 questions correctly. Write her score as a percent. Did she do better than Kofi's 72%?
3	**C** (4/100)	Which two of these equal 40%: 0.04, 4/10, 2/5, 4/100? Explain.

THE ERROR TO WATCH FOR

Writes the digits without thinking about the value: writes 3/8 as 0.38 or 38%, 0.08 as 80%, or 26 of 40 as 26%.

Reteach Have the student label an 8-part bar in 12.5% steps, point to 3 parts, and read the percent before writing any decimal.

- Reading 0.08 as 80% or 0.7 as 7% (misplacing the tenths and hundredths digits).
- Writing the part as the percent without scaling to 100 ($26 off $40 called a "26%" discount).

Calculation slip only: use Session 1 Prerequisite Practice A, then go back to the model. Wrong whole or wrong model: label the whole (100%) before redoing the arithmetic.

FRESH CHECK – GIVE AFTER RETEACHING (STUDENTS HAVE NOT SEEN IT)

Check	A school sold 33 of its 50 raffle tickets. Write the part sold as a fraction, a decimal, and a percent.
Answer	33/50 = 66/100 = 0.66 = 66%

SCORE THE CHECK

3	Model fits the numbers, correct answer with units, explanation matches. Move on; remove a support next time.
2	Right setup with a small slip, or a thin explanation. Quick feedback, then one more new problem.
1	Some correct facts, but the wrong whole or model. Reteach with the session's model and the prerequisite page.
0	Not enough to tell yet. Ask the student to point, draw or say it before writing.

LANGUAGE ACCESS

Point and draw, then say it with a partner ("Partner A: "3/8 of the pizza is ___% because ___." Partner B: "Show me on the bar where you see that.""), then write one sentence (Explain Your Thinking sheet), then explain alone. Fade one support each time.

SESSION 2 · COMPARE AND ORDER

I can compare and order values written as fractions, decimals, and percents.

EXIT TICKET – WHAT TO LOOK FOR AND WHAT TO SAY NEXT

#	Expected answer	Next prompt if it is not there yet
1	a. > b. < c. =	Write <, >, or =: 0.5 ___ 49%. Explain using hundredths.
2	35%, 37.5%, 36%, so 0.35, 36%, 3/8	Add 0.37 to the list 0.35, 3/8, 36%. Where does it go in the order?
3	**B** (3/4)	Which is the least: 0.7, 3/4, 72%, or 0.68? Explain how you know.

THE ERROR TO WATCH FOR

Compares the digits that show instead of the values (2/5 > 0.45 because 5 > 4; 0.4 < 39% because 4 < 39).

Reteach Have the student rewrite every value as a percent, mark each one on the same number line, and read the order from left to right.

- Comparing digits instead of values (0.4 < 39% "because 4 < 39").
- Treating a longer decimal as larger, or reading 0.6 as 6%.

Calculation slip only: use Session 2 Prerequisite Practice A, then go back to the model. Wrong whole or wrong model: label the whole (100%) before redoing the arithmetic.

FRESH CHECK – GIVE AFTER RETEACHING (STUDENTS HAVE NOT SEEN IT)

Check	Three seed trays sprouted 0.27, 13/50, and 31% of their seeds. Order the values from least to greatest. Explain one comparison.
Answer	13/50 = 26/100 = 26%, 0.27 = 27%, 31%. Order: 13/50, 0.27, 31% (26% < 27% < 31%).

SCORE THE CHECK

3	Model fits the numbers, correct answer with units, explanation matches. Move on; remove a support next time.
2	Right setup with a small slip, or a thin explanation. Quick feedback, then one more new problem.
1	Some correct facts, but the wrong whole or model. Reteach with the session's model and the prerequisite page.
0	Not enough to tell yet. Ask the student to point, draw or say it before writing.

LANGUAGE ACCESS

Point and draw, then say it with a partner ("Partner A: "I wrote every value as a percent: ___, ___, ___. So the order is ___." Partner B: "Which value is closest to 50%? How do you know?""), then write one sentence (Explain Your Thinking sheet), then explain alone. Fade one support each time.
