Name_____ Date_____ Period_____

LESSON 4-4 · SESSION 1 · GUIDED NOTES

Find the Percent of a Number

Learning target – I can find the percent of a number exactly. · 6.AT.4

WORDS TO KNOW

fill in the missing words

WORD	WHAT IT MEANS	EXAMPLE
part *parte*	The piece of the whole that the _____ tells about.	25% of 80 is 20
whole *entero*	The full amount. It comes right after the word "___."	in 45% of 140, the whole is 140
equation *ecuación*	A math sentence with an _____ sign.	part = 0.45 × 140

KEY IDEA

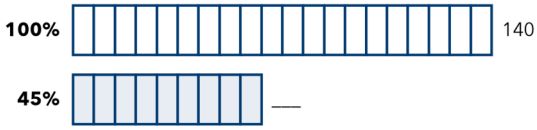

complete each sentence

- Write the percent as a _____: 45% = 0.45 and 6% = 0.06.
- Multiply: part = percent × _____.
- If the percent is less than 100%, the part is _____ than the whole.

WORKED EXAMPLE

fill in the blanks as we solve

A school sold 140 tickets. 45% were student tickets. How many were student tickets?

Step 1 The whole is ____ tickets. Each of the 20 parts is 5%.

Step 2 45% = _____

Step 3 0.45 × 140 = ___

Answer ___ **student tickets**

YOU TRY

use the example as a model

1. Find each part.

a. 30% of 40 = _____ **b.** 8% of 250 = _____ **c.** 75% of 36 = _____

2. A school of 640 students had 15% absent (not at school).

a. How many were absent? _____ students

b. How many were present? _____ students

Show your work.

SUM IT UP

in your own words

To find a percent of a number, I ___ because ___.

Name_____ Date_____ Period_____

LESSON 4-4 · SESSION 2 · GUIDED NOTES

Compare Percents

Learning target – I can compare two records fairly by converting each one to a percent. · 6.AT.4

WORDS TO KNOW

fill in the missing words

WORD	WHAT IT MEANS	EXAMPLE
part-to-whole ratio *razón de parte al entero*	Compares part of a group to the _____ group.	18 out of 24 shots
common whole *entero común*	The same total, like ____, used for every group.	75/100 and 80/100
compare *comparar*	To decide which amount is _____ or less.	80% > 75%

KEY IDEA

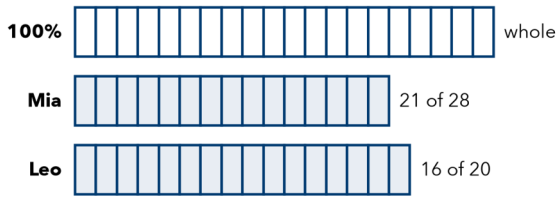

complete each sentence

- A record (how many out of how many) can fool you when the _____ are different.
- Write each record as a _____, then compare the percents.

WORKED EXAMPLE

fill in the blanks as we solve

Mia made 21 of 28 shots. Leo made 16 of 20 shots. Who has the better rate?

Step 1 Mia: 21 ÷ 28 = _____ = 75%

Step 2 Leo: 16 ÷ 20 = _____ = 80%

Step 3 Compare: 80% > 75%. Each small part of a bar is 5%.

Answer ____ **has the better rate, even though Mia made more shots.**

YOU TRY

use the example as a model

1. Write each record as a percent.

a. 9 out of 12 = _____ %

b. 18 out of 25 = _____ %

2. Ana made 14 of 20 shots. Ben made 17 of 25 shots. Who has the better rate?

Show your work.

Better rate_____

SUM IT UP

in your own words

To compare two records fairly, I ___ because ___.

_____

_____

Name_____ Date_____ Period_____

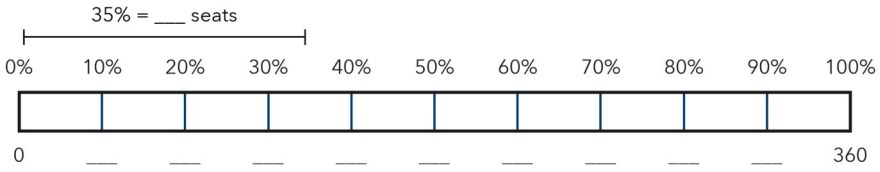

LESSON 4-4 · GUIDED NOTES · MODEL, REASON, EXPLAIN

Model It. Explain It.

SESSION 1 · FIND THE PERCENT OF A NUMBER

draw it · solve it · explain it

A theater has 360 seats. 35% of the seats are in the balcony. Use the percent bar and an equation to find how many seats are in the balcony.

a. Fill in the bar. What are 10% and 5% of 360? Use them to find 35%.

b. Write and solve an equation: part = percent × whole.

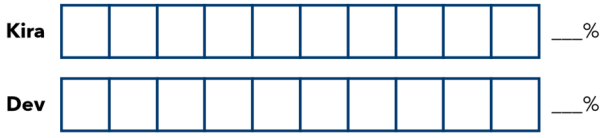

c. Explain how you know both ways give the same answer.

Challenge *Sam says 35% of 360 is 35 × 360 = 12,600. Show why that is too big.*

SESSION 2 · COMPARE PERCENTS

draw it · solve it · explain it

Kira made 36 of 60 free throws. Dev made 32 of 40. Kira made more. Shade each bar to show each percent. Who is the better shooter?

a. Write each record (how many out of how many) as a percent.

b. Who has the better rate?

c. Explain how you know.

Challenge *Lin says 54 out of 60 is better than 9 out of 10 because 54 is more than 9. Show why she is wrong.*

Check: Does my model match my numbers? Did I label units? Does my answer make sense?
