Lesson 7.4 Teaching Support Guide

Teach-tomorrow route

Print: current Guided Notes and Practice A for the class; Exit Tickets; optional Language Support and supported homework. Keep this guide and answer keys teacher-facing. Use the full-size model pages in the updated notes.

Phase	Planned minutes	Teaching move
Retrieve	5	Warm-Up items 1–4; note the missing prerequisite before launch.
Launch	7	Name the session target and invite a prediction from the conceptual task.
Model	10	Link a visual model to the worked example; rehearse the mathematical explanation.
Practice	18	Core: A #1, #2, #4, #6 and the error task. Choose remaining items from evidence.
Check	5	Exit Ticket; use the diagnostic page before assigning reteaching.

This is a planned 45-minute route, not a measured classroom duration. For a shorter lesson, keep the model and exit; reduce repeated practice. Form B is parallel practice or reassessment only when its items are unseen.

S1: Comparing Numbers on a Number Line · I can compare two rational numbers using their positions on a number line.

S2: Ordering Integers and Rational Numbers · I can order integers and rational numbers from least to greatest.

Spaced retrieval: revisit one item after 2 lessons and after approximately 1 week. Mix it with the next unit’s prerequisite check; do not announce the operation before students choose a method.

Session 1 · Comparing Numbers on a Number Line

I can compare two rational numbers using their positions on a number line. · 6.NS.C.7a

Observe and respond

Exit item	Expected evidence	Next prompt/model
1	a. < b. <	Move right for increasing numerical values; measure distance separately.
2	Kim; −9 > −14	Move right for increasing numerical values; measure distance separately.
3	C — −8 < −3	Ask the learner to show why C — −8 < −3 is correct and reject a specific distractor using a model.

Distinguish the error

Conceptual signal: Assumes greater distance from zero means a greater negative number..

Response: Move right for increasing numerical values; measure distance separately.

Also check: Comparing negatives by their digits (−40 > −13 because 40 > 13).

Also check: Thinking −0.9 > −0.09 because 0.9 > 0.09.

If calculation alone is wrong, use Session 1 Prerequisite Practice A for the matching skill, then return to the model. If the interpretation is wrong, label the quantities before reteaching the operation. Independent re-entry requires a correct setup and a connected explanation.

Session 1 · Fresh check and scoring

Reserve this check until after revision; it is distinct from the exit ticket. Do not show this teacher page to learners beforehand.

Compare −9 and −2 numerically and by absolute value.

Teacher solution: −9<−2, while |−9|>|−2|.

Score the evidence

Score	Evidence	Next action
3	Valid representation, correct result/units, connected explanation.	Continue; fade a support next time.
2	Correct setup and meaning with a calculation/notation slip, or an incomplete explanation.	Brief targeted feedback, then another unseen check.
1	Some relevant facts but a model or interpretation error.	Use the named model and the corresponding prerequisite page.
0	No interpretable evidence yet.	Oral/diagram response to separate access needs from mathematics.

Complete response anchor: −4°C is warmer and greater; −12°C is farther from zero, with absolute value 12 versus 4.

Misconception response anchor: Assumes greater distance from zero means a greater negative number.. Use move right for increasing numerical values; measure distance separately.

Language access: point/draw and label → oral rehearsal → relationship sentence → independent explanation. Offer the support needed for this task and fade it based on evidence. Suggested frame: The location or direction is ___, but the distance is ___. I know this because ___.

Session 2 · Ordering Integers and Rational Numbers

I can order integers and rational numbers from least to greatest. · 6.NS.C.7b

Observe and respond

Exit item	Expected evidence	Next prompt/model
1	a. −12, −7, 0, 3 b. −0.3, −1/4, −0.2	Rename comparable values and place them on one scaled number line.
2	coldest −9; closest to 0: −1	Rename comparable values and place them on one scaled number line.
3	B — −6.02	Ask the learner to show why B — −6.02 is correct and reject a specific distractor using a model.

Distinguish the error

Conceptual signal: Uses positive-number digit comparisons for negative numbers..

Response: Rename comparable values and place them on one scaled number line.

Also check: Ordering negatives by their digits (writing −2, −9, −14 as least to greatest).

Also check: Confusing greatest absolute value with greatest number.

If calculation alone is wrong, use Session 2 Prerequisite Practice A for the matching skill, then return to the model. If the interpretation is wrong, label the quantities before reteaching the operation. Independent re-entry requires a correct setup and a connected explanation.

Session 2 · Fresh check and scoring

Reserve this check until after revision; it is distinct from the exit ticket. Do not show this teacher page to learners beforehand.

Order −2, −1.5, −7/4, and 0.

Teacher solution: −2 < −7/4 < −1.5 < 0.

Score the evidence

Score	Evidence	Next action
3	Valid representation, correct result/units, connected explanation.	Continue; fade a support next time.
2	Correct setup and meaning with a calculation/notation slip, or an incomplete explanation.	Brief targeted feedback, then another unseen check.
1	Some relevant facts but a model or interpretation error.	Use the named model and the corresponding prerequisite page.
0	No interpretable evidence yet.	Oral/diagram response to separate access needs from mathematics.

Complete response anchor: −1.2 < −0.75 < −0.5 < 0; −3/4=−0.75. A more negative position lies farther left.

Misconception response anchor: Uses positive-number digit comparisons for negative numbers.. Use rename comparable values and place them on one scaled number line.

Language access: point/draw and label → oral rehearsal → relationship sentence → independent explanation. Offer the support needed for this task and fade it based on evidence. Suggested frame: The location or direction is ___, but the distance is ___. I know this because ___.
