LESSON 8-2 · HOMEWORK PACKET · SUPPORTED · SESSION 1 · PAGES 1–2

Addition Equations

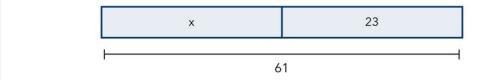

Maryland Standard 6.EE.B.7 · Learning target – I can solve an addition equation by subtracting the same amount from both sides.

REMEMBER

- Addition and subtraction are **inverse operations**. They undo each other.
- To solve $x + a = b$, **subtract** a **from both sides** to keep the equation balanced.
- **Check** by substituting your solution into the original equation.

WORKED EXAMPLE

Solve $x + 23 = 61$.

Step 1 Subtract 23 from both sides: $x = 61 - 23 = 38$

Step 2 Check: $38 + 23 = 61$, so it checks.

Answer $x = 38$

WORD BANK

inverse operation – undoes another: + and –

both sides – do the same thing to each side

check – put your answer back in

PRACTICE

show your work · label units

1. Solve each equation.

a. $x + 9 = 17$ ____

b. $n + 14 = 32$ ____

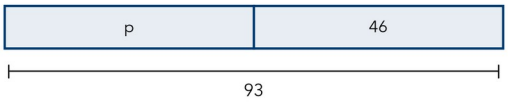

c. $25 + y = 60$ ____

d. $m + 38 = 75$ ____

e. $4.5 + k = 10$ ____

f. $w + 1.75 = 6$ ____

2. Write an addition equation for the tape diagram. Then solve it.

Equation and solution_____

3. Book Cart. A book cart held b books. A volunteer **added** 27 more books. Now the cart holds 64 books. Write an addition equation and solve it. Check your answer.

Step 1 Start + added = now.

Step 2 Subtract 27 from both sides.

Show your work.

Answer_____ books

4. Jacket. Amir has $38.50. A jacket costs $52. Write and solve an addition equation for m, the money he still needs.

Step 1 Money he has + money he needs = cost.

Step 2 Subtract 38.50 from both sides. Line up the decimals.

Answer_____ dollars

5. Check the Check. Dante solved $n + 18 = 50$ and got $n = 32$. To check, he wrote $32 - 18 = 14$, so he says his answer is wrong. Is he right? Explain how he should check.

Frame *Dante is ___. To check, he should put 32 into ___.*

_____

_____

CHECK YOURSELF	☐ I can do this on my own	☐ I need a little help	☐ I have a question about #___

AT HOME Hide some coins in one hand and show the rest. Tell someone the total and have them write and solve an addition equation for the hidden coins.

Name_____ Date_____ Period_____

LESSON 8-2 · HOMEWORK PACKET · SUPPORTED · SESSION 2 · PAGES 3–4

Subtraction Equations

Maryland Standard 6.EE.B.7 · Learning target – I can solve a subtraction equation by adding the same amount to both sides.

REMEMBER

- To solve $x - a = b$, **add** a **to both sides**.
- The solution is **greater** than b.
- **Check** by substituting into the equation.

WORKED EXAMPLE

Solve $m - 36 = 47$.

Step 1 Add 36 to both sides: $m = 47 + 36 = 83$

Step 2 Check: $83 - 36 = 47$, so it checks.

Answer $m = 83$

WORD BANK

subtraction equation – an equation like $n - 19 = 26$

add to both sides – undo the minus

left – what is still there

PRACTICE

show your work · label units

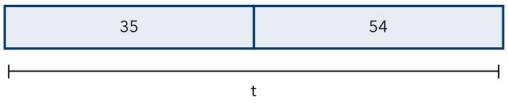

1. Solve each equation.

a. $n - 19 = 26$ ____ **b.** $k - 27 = 58$ ____ **c.** $p - 3.5 = 6$ ____

2. The tape diagram shows a whole, t, and two parts. Write a subtraction equation. Then solve it.

Step 1 The whole is t. The parts are 35 and 54.

Step 2 Whole − part = other part. Then add to solve.

Equation and solution_____

3. **Gift Card.** Destiny had g dollars on a gift card. She **spent** $18.25. She has $31.75 left. Write a subtraction equation and solve it.

Step 1 Start − spent = left.

Step 2 Add 18.25 to both sides. Line up the decimals.

Show your work.

Answer_____ dollars

4. Parking Lot. Some cars were in a lot. Then 26 cars left, and 59 cars were still there. Write and solve a subtraction equation for c, the cars at first.

Step 1 Cars at first − cars that left = cars still there.

Step 2 Add 26 to both sides.

Answer_____ cars

5. Who Is Right? Mia and Leo solve $n - 24 = 60$. Mia says $n = 36$. Leo says $n = 84$. Who is correct? Use substitution to explain.

Frame *___ is correct because ___ − 24 = 60 is true.*

_____

_____

TEST PRACTICE

choose the best answer

6. Solve $p - 29 = 45$.

A $p = 16$ **B** $p = 29$ **C** $p = 74$ **D** $p = 1{,}305$

7. A baker sold 48 muffins and had 37 left. Which equation finds m, the muffins at the start?

A $m + 48 = 37$ **B** $m - 48 = 37$ **C** $48 - m = 37$ **D** $37m = 48$

CHECK YOURSELF	□ I can do this on my own	□ I need a little help	□ I have a question about #___
