

Better Mix Debate Cards

Unit 3: Culinary Academy · Lesson 3-5 · EduWonderLab

UNIT 3 · LESSON 3-5 · TEACHER NOTES

Standard 6.RP.3

FORMAT Debate / justify	TIME 25–30 min
GROUPING Pairs or teams	TOPIC Compare Ratios
STANDARD 6.RP.3	PREP LEVEL Light — print comparison cards and debate mat

Learning goal *I can compare two ratios using equivalent ratios or unit rates and defend my choice.*

Teacher setup

- Print one card set per pair. Each card compares two situations.
- Students decide which is stronger, sweeter, faster, or a better buy.
- They must defend the choice with equivalent ratios or a unit rate.

Materials

Comparison cards, Debate mat, Sentence frames, Pencil.

Differentiation & language support

- Debate mat: Option A evidence / Option B evidence / decision (SPED).
- Sentence stem: “___ is greater because ___.”
- ESOL: define the comparison word on each card (stronger, sweeter, faster).

Key vocabulary (English / Español):

Term	Español	What it means
unit rate	tasa unitaria	a rate for one unit
compare	comparar	to decide which is greater

Quick teacher check: *Ask a pair to defend Card 4 with the two unit rates.*

Better Mix Debate Cards

Unit 3: Culinary Academy · Lesson 3-5 · EduWonderLab

Name: _____

Date: _____

Class: _____

Your goal: *I can compare two ratios using equivalent ratios or unit rates and defend my choice.*

What you need

Comparison cards, Debate mat.

How to play

1. Read both options on a card.
2. Find a unit rate or equivalent ratio for each.
3. Decide which option wins the comparison.
4. Defend your choice using the numbers.

Comparison Cards

Compare the two options on each card. Use a unit rate or equivalent ratios to decide and defend.

1. Stronger lemonade: A = 2 mix : 5 water, B = 3 mix : 8 water?	2. More red paint: A = 3 red : 4 white, B = 6 red : 9 white?
3. Faster car: A = 120 mi in 2 h, B = 150 mi in 3 h?	4. Sweeter drink: A = 4 sugar : 10 water, B = 3 sugar : 6 water?
5. Better buy: A = 3 pens for \$1.50, B = 5 pens for \$2.00?	6. Stronger coffee: A = 2 scoops : 6 cups, B = 3 scoops : 8 cups?
7. Faster reader: A = 90 pages in 3 days, B = 100 pages in 4 days?	8. More juice: A = 5 juice : 2 soda, B = 7 juice : 3 soda?

Debate mat (rate for each option + decision):

Explain your thinking

Explain why finding a unit rate makes two ratios easier to compare.

Sentence frame: ___ is greater because its rate is ___, which is more than ___.

★ **Challenge:** Card 5 compared cost per pen. Recompute it as pens per dollar. Does the better buy change? (No.)

ANSWER KEY

Teacher copy — please do not distribute to students.

UNIT 3 • LESSON 3-5 • Better Mix Debate Cards

Standard 6.RP.3

Answers

1. Stronger lemonade: A = 2 mix : 5 water, B = 3 mix : 8 water? Answer: A ($2/5 = 0.40 > 3/8 = 0.375$)	2. More red paint: A = 3 red : 4 white, B = 6 red : 9 white? Answer: A ($3/4 = 0.75 > 6/9 \approx 0.67$)
3. Faster car: A = 120 mi in 2 h, B = 150 mi in 3 h? Answer: A (60 mph > 50 mph)	4. Sweeter drink: A = 4 sugar : 10 water, B = 3 sugar : 6 water? Answer: B ($3/6 = 0.50 > 4/10 = 0.40$)
5. Better buy: A = 3 pens for \$1.50, B = 5 pens for \$2.00? Answer: B ($\$0.40/\text{pen} < \$0.50/\text{pen}$)	6. Stronger coffee: A = 2 scoops : 6 cups, B = 3 scoops : 8 cups? Answer: B ($3/8 = 0.375 > 2/6 \approx 0.33$)
7. Faster reader: A = 90 pages in 3 days, B = 100 pages in 4 days? Answer: A (30 pages/day > 25 pages/day)	8. More juice: A = 5 juice : 2 soda, B = 7 juice : 3 soda? Answer: A ($5/2 = 2.5 > 7/3 \approx 2.33$)

Teaching notes & look-fors

- Winners: 1-A, 2-A, 3-A, 4-B, 5-B, 6-B, 7-A, 8-A.
- Either unit rate (per water or per mix) works as long as it is consistent.
