

Unit Rate Market Dash

Unit 3: Culinary Academy · Lesson 3-7 · EduWonderLab

UNIT 3 · LESSON 3-7 · TEACHER NOTES

Standard 6.RP.3

FORMAT Stations / best-buy hunt

TIME 25–35 min

GROUPING Small groups rotating

TOPIC Ratio and Rate Problem Solving

STANDARD 6.RP.3

PREP LEVEL Medium — set up market station cards around the room

Learning goal *I can find unit rates and use them to choose the best buy.*

Teacher setup

- Place station cards around the room. Groups rotate and solve one per station.
- Students find each unit rate and compare to choose the best option.
- One station asks students to write their own rate problem.

Materials

Market price cards, Recording sheet, Pencil (no calculator).

Differentiation & language support

- Calculator-free work boxes keep the focus on dividing to find rate (SPED).
- Sentence stem: “The best choice is ___ because each ___ costs ___.”
- ESOL: label every rate with its unit (per pound, per ounce).

Key vocabulary (English / Español):

Term	Español	What it means
unit rate	tasa unitaria	a rate per one unit
best buy	mejor compra	the lowest cost per unit

Quick teacher check: *Collect the best-buy decision for Card 6.*

Unit Rate Market Dash

Unit 3: Culinary Academy · Lesson 3-7 · EduWonderLab

Name: _____

Date: _____

Class: _____

Your goal: *I can find unit rates and use them to choose the best buy.*

What you need

Market price cards, Recording sheet.

How to play

1. Go to a station and read the prices or amounts.
2. Find the unit rate by dividing.
3. Compare to decide the best buy.
4. Record the rate and your choice. Rotate to the next station.

Market Stations

At each station, find the unit rate. Use it to compare and pick the best buy.

1. 12 oz of cereal for \$3.00. Price per ounce?	2. 5 lb of apples for \$10.00. Price per pound?
3. A car goes 200 mi on 8 gal. Miles per gallon?	4. \$6.00 for 3 notebooks. Price per notebook?
5. You type 150 words in 5 minutes. Words per minute?	6. Best buy: 6 cans for \$4.50 or 10 cans for \$7.00?
7. 8 apples for \$2.00. Price per apple?	8. 240 heartbeats in 4 minutes. Beats per minute?

Recording sheet (unit rate + best choice):

Explain your thinking

Explain how a unit rate helps you choose the best buy when package sizes are different.

Sentence frame: *The best choice is ___ because each ___ costs ___.*

★ **Challenge:** Write your own best-buy problem with two package sizes. Include the answer for the teacher.

ANSWER KEY

Teacher copy — please do not distribute to students.

UNIT 3 • LESSON 3-7 • Unit Rate Market Dash

Standard 6.RP.3

Answers

1. 12 oz of cereal for \$3.00. Price per ounce? Answer: \$0.25 per oz	2. 5 lb of apples for \$10.00. Price per pound? Answer: \$2.00 per lb
3. A car goes 200 mi on 8 gal. Miles per gallon? Answer: 25 mi/gal	4. \$6.00 for 3 notebooks. Price per notebook? Answer: \$2.00 each
5. You type 150 words in 5 minutes. Words per minute? Answer: 30 words/min	6. Best buy: 6 cans for \$4.50 or 10 cans for \$7.00? Answer: 10-pack ($\$0.70 < \0.75 per can)
7. 8 apples for \$2.00. Price per apple? Answer: \$0.25 each	8. 240 heartbeats in 4 minutes. Beats per minute? Answer: 60 beats/min

Teaching notes & look-fors

- Card 6: $\$4.50/6 = \0.75 ; $\$7.00/10 = \$0.70 \rightarrow$ 10-pack is the better buy.
- Unit rate = total $\div$ number of units.
