

Arcade Better-Buy Tournament

Unit 4: Arcade Builder · Lesson 4-1 · Flagship · EduWonderLab

UNIT 4 · LESSON 4-1 ★ FLAGSHIP · TEACHER NOTES

Standard 6.RP.2

FORMAT Budget tournament	TIME 30–35 min
GROUPING Teams of 3–4	TOPIC Rates and Unit Rates (Flagship)
STANDARD 6.RP.2	PREP LEVEL Medium — print arcade booth cards, bracket, budget sheet

Learning goal *I can use unit rates to plan the most profitable arcade booth.*

Teacher setup

- Print one card set, bracket, and budget sheet per team.
- Teams compare token packages, prize costs, and time rates.
- Each comparison advances a winner through the bracket to a final plan.

Materials

Arcade booth cards, Tournament bracket, Budget sheet, Pencil.

Differentiation & language support

- Budget sheet tracks tokens, prizes, and earnings (SPED).
- Sentence stem: “___ is the better buy because each ___ costs ___.”
- ESOL: connect each card to a real arcade choice.

Key vocabulary (English / Español):

Term	Español	What it means
budget	presupuesto	a plan for spending money
profit	ganancia	money earned after costs

Quick teacher check: *Check the token math on Card 2 ($\$12 \div \$0.20 = 60$ tokens).*

Arcade Better-Buy Tournament

Unit 4: Arcade Builder · Lesson 4-1 · Flagship · EduWonderLab

Name: _____ Date: _____ Class: _____

Your goal: *I can use unit rates to plan the most profitable arcade booth.*

What you need

Arcade booth cards, Budget sheet.

How to play

1. Read two options on a bracket card.
2. Find the unit rate (per token, per ticket, per hour).
3. Advance the better option to the next round of the bracket.
4. Use the winners to write your final booth plan.

Arcade Comparison Cards

Compare each arcade choice using a unit rate. Build the most profitable booth plan.

1. Tokens: A = 20 for \$5.00, B = 50 for \$10.00. Better deal?	2. At \$0.20 per token, how many tokens does \$12.00 buy?
3. A game gives 8 tickets per play. Tickets for 3 plays?	4. Prize A = 150 tickets, Prize B = 200 tickets. With 180 tickets, which can you win?
5. A booth earns \$0.50 per play and runs 40 plays in an hour. Hourly earnings?	6. Machine 1 = 12 tickets per \$1, Machine 2 = 25 tickets per \$2. Better rate?

Budget sheet (compare + final plan):

Explain your thinking

Explain how unit rates helped your team decide where to spend tokens.

Sentence frame: We chose ___ because the unit rate was ___, which is better than ___.

★ **Challenge:** With a \$20 budget at \$0.20 per token, plan plays so your team can win Prize B (200 tickets).

ANSWER KEY

Teacher copy — please do not distribute to students.

Standard 6.RP.2

Answers

1. Tokens: A = 20 for \$5.00, B = 50 for \$10.00. Better deal? Answer: B ($\$0.20/\text{token} < \$0.25/\text{token}$)	2. At \$0.20 per token, how many tokens does \$12.00 buy? Answer: 60 tokens
3. A game gives 8 tickets per play. Tickets for 3 plays? Answer: 24 tickets	4. Prize A = 150 tickets, Prize B = 200 tickets. With 180 tickets, which can you win? Answer: Prize A only
5. A booth earns \$0.50 per play and runs 40 plays in an hour. Hourly earnings? Answer: \$20.00 per hour	6. Machine 1 = 12 tickets per \$1, Machine 2 = 25 tickets per \$2. Better rate? Answer: Machine 2 ($12.5 \text{ tickets}/\$1 > 12$)

Teaching notes & look-fors

- Card 6: Machine 2 gives 12.5 tickets per dollar vs 12 — the better rate.
- Challenge: \$20 buys 100 tokens; teams plan ticket-earning games to reach 200 tickets.
