

Fraction-Decimal-Percent Dominoes

Unit 4: Arcade Builder · Lesson 4-2 · EduWonderLab

UNIT 4 · LESSON 4-2 · TEACHER NOTES

Standard 6.RP.3c

FORMAT Dominoes matching chain

TIME 25–30 min

GROUPING Pairs or small groups

TOPIC Relate Fractions, Decimals, and Percents

STANDARD 6.RP.3c

PREP LEVEL Light — print and cut domino cards

Learning goal *I can write a number as a fraction, a decimal, and a percent.*

Teacher setup

- Print and cut one domino set per group. Each domino connects equivalent forms.
- To place a domino, students show one conversion method.
- Include benchmark dominoes: $\frac{1}{2}$, $\frac{1}{4}$, $\frac{3}{4}$, $\frac{1}{10}$.

Materials

Domino cards, Conversion notes strip, Recording sheet, Pencil.

Differentiation & language support

- Conversion strip: fraction $\rightarrow$ decimal (divide), decimal $\rightarrow$ percent ($\times 100$) (SPED).
- Sentence stem: “I changed ___ to ___ by ___.”
- ESOL: color-code each form (fraction, decimal, percent).

Key vocabulary (English / Español):

Term	Español	What it means
equivalent	equivalente	equal in value
percent	por ciento	out of 100

Quick teacher check: *Ask a student to show the conversion from $\frac{2}{5}$ to a percent (Card 5).*

Fraction-Decimal-Percent Dominoes

Unit 4: Arcade Builder · Lesson 4-2 · EduWonderLab

Name: _____

Date: _____

Class: _____

Your goal: *I can write a number as a fraction, a decimal, and a percent.*

What you need

Domino cards, Conversion notes strip.

How to play

1. Pick a domino and read the value.
2. Find the matching decimal and percent.
3. Show one conversion method to place the domino.
4. Build the longest chain you can.

Conversion Cards

Match each fraction, decimal, and percent that name the same value. Show one conversion to place a domino.

1. $\frac{1}{2} = \underline{\hspace{1cm}}$ (decimal) = $\underline{\hspace{1cm}}$ (percent)	2. $\frac{1}{4} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$
3. $\frac{3}{4} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$	4. $\frac{1}{10} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$
5. $\frac{2}{5} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$	6. $\frac{3}{5} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$
7. $\frac{1}{5} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$	8. $\frac{7}{10} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$
9. $\frac{1}{20} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$	10. $\frac{9}{10} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$

Record your work (show one conversion each):

Explain your thinking

Explain how a fraction, a decimal, and a percent can all name the same amount.

Sentence frame: *I changed the fraction $\underline{\hspace{1cm}}$ to a decimal by $\underline{\hspace{1cm}}$ and to a percent by $\underline{\hspace{1cm}}$.*

★ **Challenge:** Card 9 is $\frac{1}{20}$. Find another fraction equal to 5% with a different denominator.

ANSWER KEY

Teacher copy — please do not distribute to students.

UNIT 4 • LESSON 4-2 • Fraction-Decimal-Percent Dominoes

Standard 6.RP.3c

Answers

1. $\frac{1}{2} = \underline{\hspace{1cm}}$ (decimal) = $\underline{\hspace{1cm}}$ (percent) Answer: 0.5 = 50%	2. $\frac{1}{4} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$ Answer: 0.25 = 25%
3. $\frac{3}{4} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$ Answer: 0.75 = 75%	4. $\frac{1}{10} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$ Answer: 0.1 = 10%
5. $\frac{2}{5} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$ Answer: 0.4 = 40%	6. $\frac{3}{5} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$ Answer: 0.6 = 60%
7. $\frac{1}{5} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$ Answer: 0.2 = 20%	8. $\frac{7}{10} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$ Answer: 0.7 = 70%
9. $\frac{1}{20} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$ Answer: 0.05 = 5%	10. $\frac{9}{10} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$ Answer: 0.9 = 90%

Teaching notes & look-fors

- Fraction → decimal: divide numerator by denominator. Decimal → percent: multiply by 100.
- Challenge: $5\% = \frac{1}{20} = \frac{2}{40} = 0.05$.
