

Measurement Conversion Ladder

Unit 4: Arcade Builder · Lesson 4-6 · EduWonderLab

UNIT 4 · LESSON 4-6 · TEACHER NOTES

Standard 6.RP.3d

FORMAT Ladder climb game

TIME 25–30 min

GROUPING Pairs

TOPIC Convert Measurement Units

STANDARD 6.RP.3d

PREP LEVEL Light — print ladder mats, unit cards, factor cards

Learning goal *I can convert measurement units by multiplying or dividing by a conversion factor.*

Teacher setup

- Print one ladder mat and card set per pair.
- Students move up ($\times$) or down ($\div$) the ladder using the conversion factor.
- Each move must show the multiplication or division.

Materials

Conversion ladder mats, Unit cards, Factor cards, Pencil.

Differentiation & language support

- Factor reference: 1 ft = 12 in, 1 lb = 16 oz, 1 km = 1,000 m (SPED).
- Sentence stem: “I ___ by ___ because ___ unit equals ___.”
- ESOL: pair each unit with a real object (a ruler, a water bottle).

Key vocabulary (English / Español):

Term	Español	What it means
convert	convertir	to change from one unit to another
conversion factor	factor de conversión	the number that links two units

Quick teacher check: *Ask a pair to explain why Card 4 used division (in $\rightarrow$ ft).*

Measurement Conversion Ladder

Unit 4: Arcade Builder · Lesson 4-6 · EduWonderLab

Name: _____

Date: _____

Class: _____

Your goal: *I can convert measurement units by multiplying or dividing by a conversion factor.*

What you need

Ladder mat, Unit cards, Factor cards.

How to play

1. Draw a card with a measurement to convert.
2. Choose the conversion factor.
3. Multiply (to a smaller unit) or divide (to a larger unit).
4. Show the move on your ladder mat.

Conversion Cards

Climb up by multiplying or down by dividing, using the right conversion factor.

1. 3 ft = ____ in	2. 5 lb = ____ oz
3. 2 gal = ____ qt	4. 48 in = ____ ft
5. 3 km = ____ m	6. 2,500 mL = ____ L
7. 4 hr = ____ min	8. 2 yd = ____ ft
9. 6 qt = ____ pt	10. 5,000 g = ____ kg

Record your work (factor + operation):

Explain your thinking

Explain when you multiply and when you divide to convert units.

Sentence frame: *I ____ by ____ because 1 ____ equals ____.*

★ **Challenge:** Card 5 went $\text{km} \rightarrow \text{m}$. Convert 3 km all the way to centimeters. (300,000 cm)

ANSWER KEY

Teacher copy — please do not distribute to students.

UNIT 4 • LESSON 4-6 • Measurement Conversion Ladder

Standard 6.RP.3d

Answers

1. 3 ft = ____ in Answer: 36 in ($\times 12$)	2. 5 lb = ____ oz Answer: 80 oz ($\times 16$)
3. 2 gal = ____ qt Answer: 8 qt ($\times 4$)	4. 48 in = ____ ft Answer: 4 ft ($\div 12$)
5. 3 km = ____ m Answer: 3,000 m ($\times 1,000$)	6. 2,500 mL = ____ L Answer: 2.5 L ($\div 1,000$)
7. 4 hr = ____ min Answer: 240 min ($\times 60$)	8. 2 yd = ____ ft Answer: 6 ft ($\times 3$)
9. 6 qt = ____ pt Answer: 12 pt ($\times 2$)	10. 5,000 g = ____ kg Answer: 5 kg ($\div 1,000$)

Teaching notes & look-fors

- Bigger unit $\rightarrow$ smaller unit: multiply. Smaller $\rightarrow$ bigger: divide.
- Challenge: 3 km = 3,000 m = 300,000 cm.
