

Coordinate Map Mission

Unit 9: Treasure Map Navigator · Lesson 9-1 · Flagship · EduWonderLab

UNIT 9 · LESSON 9-1 ★ FLAGSHIP · TEACHER NOTES

Standard 6.NS.6

FORMAT Design + trade mission

TIME 30–35 min

GROUPING Teams of 3–4

TOPIC Graph on the Coordinate Plane (Flagship)

STANDARD 6.NS.6

PREP LEVEL Medium — print large grids and clue-writing template

Learning goal *I can design a coordinate map, write ordered-pair clues, and check a partner team's route.*

Teacher setup

- Print one large grid and template per team.
- Teams design a treasure route and write ordered-pair clues.
- Teams trade maps; the receiving team plots and checks the route.

Materials

Large coordinate grid, Map symbols, Clue-writing template, Pencil.

Differentiation & language support

- Template requires labeling the x-coordinate and y-coordinate (SPED).
- Sentence stem: “Move to (__, __): __ right and __ up.”
- ESOL: provide map symbols so reading load stays low.

Key vocabulary (English / Español):

Term	Español	What it means
route	ruta	the path between points
coordinate	coordenada	a number in an ordered pair

Quick teacher check: *Check that traded routes match the written clues.*

Coordinate Map Mission

Unit 9: Treasure Map Navigator · Lesson 9-1 · Flagship · EduWonderLab

Name: _____ Date: _____ Class: _____

Your goal: *I can design a coordinate map, write ordered-pair clues, and check a partner team's route.*

What you need

Large coordinate grid, Map symbols, Clue-writing template.

How to play

1. Design a treasure route using points on the grid.
2. Write an ordered-pair clue for each point.
3. Trade maps with another team.
4. Plot their route and confirm it matches their clues.

Mission Tasks

Design a route on the grid, write ordered-pair clues, then trade and check.

1. Plot 4 points for a square: (1,1), (1,4), (4,4), (4,1). Is it a square?	2. Write a clue for treasure at (3, 5).
3. A point is on the x-axis at x = 6. Name it.	4. A point is on the y-axis at y = 2. Name it.
5. Trade maps and plot a partner team's first three clues.	6. Challenge: design a 5-point route and list the ordered pairs.

Mission log (route points + clues):

Explain your thinking

Explain why clear ordered-pair clues help another team find your treasure.

Sentence frame: *Move to (___, ___): ___ right and ___ up.*

★ **Challenge:** *Design a route that includes one point on the x -axis and one on the y -axis.*

ANSWER KEY

Teacher copy — please do not distribute to students.

UNIT 9 • LESSON 9-1 ★ FLAGSHIP • Coordinate Map Mission

Standard 6.NS.6

Answers

1. Plot 4 points for a square: (1,1), (1,4), (4,4), (4,1). Is it a square? Answer: Yes — each side is 3 units	2. Write a clue for treasure at (3, 5). Answer: “Move to $x = 3$, $y = 5$.”
3. A point is on the x-axis at $x = 6$. Name it. Answer: (6, 0)	4. A point is on the y-axis at $y = 2$. Name it. Answer: (0, 2)
5. Trade maps and plot a partner team’s first three clues. Answer: Points should match their written clues	6. Challenge: design a 5-point route and list the ordered pairs. Answer: e.g., (1,1), (2,3), (4,3), (5,1), (3,0)

Teaching notes & look-fors

- A square’s vertices share x- or y-values (Card 1).
- Axis points have a 0 coordinate (Cards 3 and 4).
