

# Coordinate Treasure Hunt

Unit 9: Treasure Map Navigator · Lesson 9-1 · EduWonderLab

## UNIT 9 · LESSON 9-1 · TEACHER NOTES

Standard 6.NS.6

|                                   |                                                                 |
|-----------------------------------|-----------------------------------------------------------------|
| <b>FORMAT</b> Plot-to-reveal hunt | <b>TIME</b> 25–30 min                                           |
| <b>GROUPING</b> Pairs             | <b>TOPIC</b> Graph on the Coordinate Plane                      |
| <b>STANDARD</b> 6.NS.6            | <b>PREP LEVEL</b> Light — print coordinate grids and clue cards |

**Learning goal** *I can plot ordered pairs on a coordinate plane and describe their locations.*

### Teacher setup

- Print one grid and clue set per pair. Start in the first quadrant.
- Students plot each point; correct points reveal a path or shape.
- Offer an all-quadrant challenge after the first quadrant.

### Materials

Coordinate grids, Ordered-pair clue cards, Ruler, Pencil.

### Differentiation & language support

- Reminder: x first (right), y second (up) (SPED).
- Sentence stem: “The point (\_\_, \_\_) is \_\_ from the origin.”
- ESOL: label the x-axis and y-axis on the grid.

**Key vocabulary (English / Español):**

| Term             | Español              | What it means              |
|------------------|----------------------|----------------------------|
| coordinate plane | plano de coordenadas | a grid for plotting points |
| ordered pair     | par ordenado         | (x, y) that names a point  |

**Quick teacher check:** *Watch for students who reverse x and y (Card 6 helps catch this).*

# Coordinate Treasure Hunt

Unit 9: Treasure Map Navigator · Lesson 9-1 · EduWonderLab

Name: \_\_\_\_\_ Date: \_\_\_\_\_ Class: \_\_\_\_\_

**Your goal:** *I can plot ordered pairs on a coordinate plane and describe their locations.*

## What you need

Coordinate grids, Clue cards, Ruler.

## How to play

1. Read a clue card with an ordered pair.
2. Start at the origin, move right for x, then up for y.
3. Plot the point and label it.
4. Connect points in order to reveal the path.

## Clue Cards

Plot each ordered pair (x first, then y). Connect the points to reveal your path.

|                 |                                                        |
|-----------------|--------------------------------------------------------|
| 1. Plot (2, 3). | 2. Plot (5, 1).                                        |
| 3. Plot (4, 6). | 4. Plot (0, 4).                                        |
| 5. Plot (3, 0). | 6. Which is farther right: (5, 1) or (2, 3)?           |
| 7. Plot (6, 6). | 8. Connect (2, 3) → (5, 1) → (4, 6). What shape forms? |

**Record your work (plot + describe):**

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

## Explain your thinking

Explain why (4, 6) and (6, 4) are different points.

**Sentence frame:** *The point (\_\_\_\_, \_\_\_\_ ) is found by moving \_\_\_\_ then \_\_\_\_.*

★ **Challenge:** Plot  $(0, 4)$  and  $(3, 0)$ . Explain why each one sits on an axis.

# ANSWER KEY

Teacher copy — please do not distribute to students.

## UNIT 9 • LESSON 9-1 • Coordinate Treasure Hunt

Standard 6.NS.6

### Answers

|                                                                        |                                                                                            |
|------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|
| <b>1.</b> Plot (2, 3).<br><b>Answer:</b> 2 right, 3 up                 | <b>2.</b> Plot (5, 1).<br><b>Answer:</b> 5 right, 1 up                                     |
| <b>3.</b> Plot (4, 6).<br><b>Answer:</b> 4 right, 6 up                 | <b>4.</b> Plot (0, 4).<br><b>Answer:</b> On the y-axis, 4 up                               |
| <b>5.</b> Plot (3, 0).<br><b>Answer:</b> On the x-axis, 3 right        | <b>6.</b> Which is farther right: (5, 1) or (2, 3)?<br><b>Answer:</b> (5, 1) — larger x    |
| <b>7.</b> Plot (6, 6).<br><b>Answer:</b> 6 right, 6 up (corner of map) | <b>8.</b> Connect (2, 3) → (5, 1) → (4, 6). What shape forms?<br><b>Answer:</b> A triangle |

### Teaching notes & look-fors

- The x-coordinate is the horizontal move; the y-coordinate is vertical.
- Points on an axis have a 0 coordinate (Cards 4 and 5).
