Math is Mine

Everyone does math. Share your math story and estimate with a small group you can count.

Name _____ **Date** _____

Tonight's spark

A fair ticket says: Ferris wheel, 20 cars, about 4 riders in each car. About how many people can ride at one time?

Make a guess first: more or less than 50 people?

Try it

Work it out on paper. Write one answer on each line.

1 **Which word means a reasoned answer that is close enough to be useful?**

A. Exact count **B.** Estimate **C.** Random guess **D.** Total

My answer _____

2 **A small train has 5 cars. About 4 people fit in each car. About how many people ride the train?**

A. 20 **B.** 9 **C.** 1 **D.** 54

My answer _____

3 **Which way of breaking 36 into tens and ones is correct?**

A. 3 + 6 **B.** 30 + 60 **C.** 30 + 6 **D.** 13 + 6

My answer _____

4 **A shelf holds about 8 books. A bookcase has 6 shelves just like it. About how many books are in the bookcase?**

A. 14 **B.** 86 **C.** 2 **D.** 48

My answer _____

5 **A stadium section has 40 rows with about 25 seats in each row. Which is the most reasonable estimate of the seats?**

A. 65 **B.** 1,000 **C.** 10,000

My answer _____

6 **Mia counts 12 peas in one scoop. The bowl holds about 9 scoops. About how many peas are in the bowl?**

A. 21 **B.** 96 **C.** 108 **D.** 1,008

My answer _____

Talk about it

What small group did you count, and how did you decide how many of those groups fill the whole thing?

Home mission

Pick a full drawer or bag at home. Ask your student to count one small handful first. Then ask: about how many handfuls fill it? Let your student be the teacher and explain the estimate.

If we get stuck, ask

- What is one small group you can count?
- How many groups like that fit in the whole thing?
- Tell me one time you used math outside of school.

Do it on a screen

Scan or type the link. Same lesson, with hints.
