Math is Exploring and Thinking

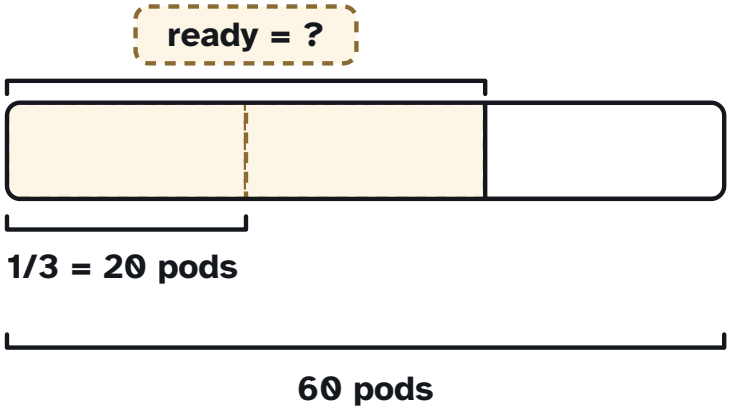
Find a fraction of a whole number: divide by the bottom, then multiply by the top.

Name _____ **Date** _____

Tonight's spark

A school garden map shows 60 pea pods on the vines. A sign says 2/3 of them are ready to pick. How many pods are ready?

Make a guess first: are more than half of the pods ready, or fewer?



Our class model: divide, then multiply

Try it

Work it out on paper. Write one answer on each line.

1 **What is 1/2 of 10?**

A. 5 **B.** 20 **C.** 12

My answer _____

2 **What is 1/3 of 12?**

A. 36 **B.** 9 **C.** 4 **D.** 15

My answer _____

3 **To find 3/4 of 20, what do you do first?**

A. Multiply 20 by 3 **B.** Divide 20 by 4 **C.** Divide 20 by 3 **D.** Add 20 and 4

My answer _____

4 **What is 2/3 of 30?**

A. 10 **B.** 15 **C.** 60 **D.** 20

My answer _____

5 **A box has 20 crayons. 3/5 of them are used. How many crayons are used?**

A. 4 **B.** 12 **C.** 60 **D.** 15

My answer _____

6 **A class has 35 students. 2/5 of them walk to school. How many students walk?**

A. 14 **B.** 7 **C.** 70 **D.** 33

My answer _____

Talk about it

Can two thirds of the pods be more than all of the pods?

Home mission

A different situation: set out 12 beans, coins, or pasta pieces. Ask your student to make 3 equal piles. Then ask for 2/3 of the beans. How many is that?

If we get stuck, ask

- How many equal groups does the bottom number ask for?
- What is one of those groups worth?
- Does your answer make sense compared to the whole?

Do it on a screen

Scan or type the link. Same lesson, with hints.
