Math is Boundless

Design with repeating shapes and use the pattern unit to predict what comes next.

Name _____ **Date** _____

Tonight's spark

A mural border repeats pink circle, purple square, blue triangle, again and again. What shape is number 12 in the border?

Guess first: a circle, a square, or a triangle?

Try it

Finish each sentence in your own words.

1. **The pattern unit is ___ shapes long: ___, ___, ___.**

   My words _____

2. **The ___ shows repetition because ___ comes back.**

   My words _____

3. **My pattern repeats ___, ___, ___.**

   My words _____

4. **I add rhythm by changing the ___ of the shapes.**

   My words _____

5. **I can predict the next shape because ___.**

   My words _____

Talk about it

Who can repeat a small group of shapes in a row?

Home mission

Line up forks, spoons, and cups in a repeating row: fork, spoon, cup. Ask your student to name the pattern unit. Which item will be number 9? Then count to check.

If we get stuck, ask

- Which part repeats?
- How many items are in one repeat?
- What does the remainder tell you?

Do it on a screen

Scan or type the link. Same lesson, with hints.
