Math is Mine — Homework

Lesson 10-6 • Standard MPP.3

Name: _____ **Period:** _____ **Date:** _____

Today's Goals

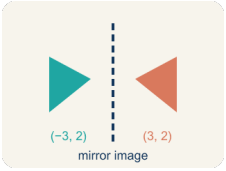

Content: I can look back at my answers from Lesson 1-1, describe how my math biography has changed this year, and recognize ways we are all doers of math.

Language: I can compare my beginning-of-year and end-of-year math stories using the words then, now, changed, and grown.

Key Words

math biography (biografía matemática) — The story of your relationship with math — and how it has changed over time.

reflect (reflexionar) — To look back at what you did, felt, and learned, and think about what it means.

growth (crecimiento) — The change between what you could do before and what you can do now.

confidence (confianza) — Trusting yourself to try a problem, even when the first attempt might fail.

community (comunidad) — The people and places around you — where math shows up outside the classroom.

Practice

Show your work. Use the blank space under each problem.

1. In Lesson 1-1 you estimated the Ferris wheel: 20 cars each holding about 4 people. About how many riders was that?

A. About 5
B. About 24
C. About 80
D. About 400

2. How has your attitude about math changed over the year?

3. Now stretch the September estimate with this year's math: about 80 riders per turn, 6 turns each hour. About how many riders per hour?

A. About 13
B. About 86
C. About 480
D. About 800

4. Percents were new this year. What is 50% of 157?

A. 31.4
B. 77.5
C. 78.5
D. 107

5. What challenges did you face in math this year, and how did you respond to these challenges?

6. Which of these is the strongest evidence that YOUR math reasoning grew this year?

A. You finish worksheets faster than in September
B. You memorized more answers than before
C. You can explain why a method works, not just follow its steps
D. You stopped making any mistakes

7. Ask a classmate, family member, or trusted adult how their math story has changed. You may also reflect on your own story. Describe one change since the beginning of the year and give an example.

8. In what areas are you more confident about math now? What are your strengths in math?

9. Answer each quick problem with this year's skills — the same numbers you met in Lesson 1-1.

Problem from this year	Thinking	Answer
50% of 157	half of 157	
10% of 480	move the decimal	

Problem from this year	Thinking	Answer
Riders per hour: 80 per turn × 6 turns	80 × 6
