Divide Whole Numbers by Fractions

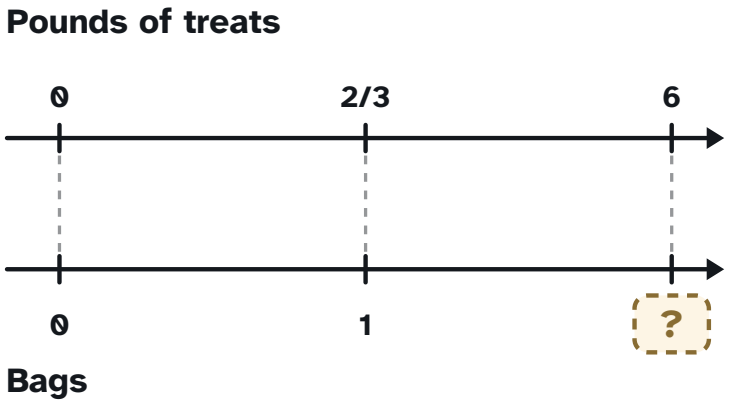
Solve a real problem by dividing a whole number by a fraction and checking the answer is bigger.

Name _____ **Date** _____

Tonight's spark

An animal shelter gets 6 pounds of dog treats. It packs them in bags of 2/3 pound each. How many bags will the shelter have?

Guess first: will the shelter have more than 6 bags, or fewer?



Our class model: put the whole number over 1

Try it

Work it out on paper. Write one answer on each line.

1 **When you divide a whole number by a fraction less than 1, the answer is...**

A. smaller than the whole number **B.** exactly the same as the whole number
C. bigger than the whole number

My answer _____

2 **6 pounds of rice go into bags that each hold 2/3 pound. Which division sentence fits?**

A. 6 ÷ 2/3 **B.** 2/3 ÷ 6 **C.** 6 × 2/3 **D.** 6 – 2/3

My answer _____

3 **Find 9 ÷ 3/4.**

A. 27/4 **B.** 12 **C.** 6 **D.** 36

My answer _____

4 **Find 10 ÷ 5/6.**

A. 8 1/3 **B.** 16 **C.** 60 **D.** 12

My answer _____

5 **A hose fills buckets that each hold 3/4 gallon. How many buckets can it fill with 6 gallons?**

A. 8 **B.** 4 1/2 **C.** 9

My answer _____

Talk about it

Should the answer be more than 4 or less than 4? How do you know?

Home mission

Pour 3 cups of dry beans into a bowl. Find a 1/3-cup scoop. Guess first: more or fewer than 3 scoops? Then scoop and count. Does the count match 3 ÷ 1/3?

If we get stuck, ask

- How many of those fit into this? Say it in words first.
- Did you flip the second fraction?
- Is the divisor less than 1? Then which way should the answer go?

Do it on a screen

Scan or type the link. Same lesson, with hints.
