

LESSON 2-3 • SESSION 1 • GUIDED NOTES

Finding the Median

Learning target – I can find the median of a data set by ordering the values and taking the middle one. · 6.SP.B.5c

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
median <i>mediana</i>	The _____ value of a data set in order.	2, 4, 6 , 7, 9
data set <i>conjunto de datos</i>	A _____ of values you collect.	7, 2, 9, 4, 6
order <i>ordenar</i>	To list values from _____ to greatest.	2, 4, 6, 7, 9

KEY IDEA*complete each sentence*

- Always _____ the values before you find the median.
- With an odd number of values, the median is the _____ value in the middle.
- Changing the greatest value does not _____ the median.

WORKED EXAMPLE*fill in the blanks as we solve*

Find the median of 7, 2, 9, 4, 6.

Step 1 Order the values: 2, 4, ____, 7, 9.**Step 2** Cross off one value from each end until ____ is left.**Answer** Median = ____**YOU TRY***use the example as a model***1.** Find each median.**a.** 5, 1, 8 _____**b.** 12, 7, 15, 9, 10 _____**2.** Ages: 11, 13, 12, 15, 11, 14, 12. Find the median age.**Answer** _____ years**SUM IT UP***in your own words*

To find the median, I first ____, then ____.

LESSON 2-3 • SESSION 2 • GUIDED NOTES

Median of an Even Data Set

Learning target – I can find the median of a data set with an even number of values by averaging the two middle values. ·
6.SP.B.5c

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
even number of values <i>número par de valores</i>	A data set with ____ values in the middle.	8, 12, 15 , 19
middle values <i>valores centrales</i>	The two values left after you cross off from both ____.	12 and 15
average of two numbers <i>promedio de dos números</i>	Add the two numbers, then ____ by 2.	$(12 + 15) \div 2 = 13.5$

KEY IDEA*complete each sentence*

- With an even number of values, the median is ____ between the two middle values.
- The median does not have to be one of the ____ in the set.

WORKED EXAMPLE*fill in the blanks as we solve*

Find the median of 15, 8, 19, 12.

Step 1 Order: 8, __, __, 19.

Step 2 Add the middle values and divide by 2: $27 \div 2$.

Answer Median = ____

YOU TRY*use the example as a model*

1. Find each median.

a. 3, 9, 5, 7 ____

b. 20, 14, 18, 12, 10, 16 ____

2. Six puppies weigh 8, 12, 5, 14, 10 and 7 pounds. Find the median weight.

Answer _____ pounds

SUM IT UP*in your own words*

When a data set has an even number of values, I find the median by ____.
