

LESSON 2-5 • SESSION 1 • GUIDED NOTES

Range and IQR

Learning target – I can find the range and the interquartile range of a data set. · 6.SP.B.5c

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
range <i>rango</i>	The greatest value _____ the least value.	$20 - 5 = 15$
interquartile range (IQR) <i>rango intercuartil</i>	Q3 minus Q1; the spread of the _____.	$18 - 8 = 10$
extreme value <i>valor extremo</i>	A value far from the others; it changes the _____ a lot.	62 in 11, 14, 16, 19, 62

KEY IDEA*complete each sentence*

- Range and IQR both measure _____, or variability.
- Changing only the greatest value changes the range but not the _____.

WORKED EXAMPLE*fill in the blanks as we solve*

Hikes (km): 5, 12, 8, 20, 15, 10, 18. Find the range and the IQR.

Step 1 Order: 5, 8, 10, 12, 15, 18, 20. Range = $20 - 5 = \underline{\hspace{1cm}}$.**Step 2** Q1 = $\underline{\hspace{1cm}}$ and Q3 = $\underline{\hspace{1cm}}$.**Answer** **IQR = $18 - 8 = \underline{\hspace{1cm}}$ km****YOU TRY***use the example as a model***1.** Data: 4, 9, 6, 15, 11, 7, 13.**a.** Range: _____**b.** IQR: _____**2.** A set has min 12 and range 25. Find the max.**Max** _____**SUM IT UP***in your own words**The IQR is often better than the range when _____ because _____.*

LESSON 2-5 • SESSION 2 • GUIDED NOTES

Comparing Variability

Learning target – I can compare the variability of two data sets using range and IQR. • 6.SP.B.5c

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
consistent <i>constante</i>	Values are close together; the spread is _____.	IQR 4 vs. IQR 12
measure of variability <i>medida de variabilidad</i>	A number that tells how _____ data are.	range, IQR
extreme value <i>valor extremo</i>	A value far from the rest; it stretches the _____.	40 in 0, 3, 10, 18, 40

KEY IDEA*complete each sentence*

- Compare the _____ measure for both groups. The smaller value means more consistent.
- When one value is far from the rest, trust the _____ more than the range.

WORKED EXAMPLE*fill in the blanks as we solve*

Class R: range 18, IQR 12. Class S: range 35, IQR 25. Which class is more consistent?

Step 1 Ranges: $18 < 35$, so R is _____ spread overall.**Step 2** IQRs: $12 < 25$, so R's _____ is closer together.**Answer** Class _____ is more consistent.**YOU TRY***use the example as a model*

1. Find each IQR. Circle the more consistent set.

a. P: $Q1 = 30$, $Q3 = 42$ _____**b.** Q: $Q1 = 33$, $Q3 = 39$ _____

2. Set A: range 50, IQR 8. Set B: range 22, IQR 16. Which set likely has one unusual value?

Set _____

SUM IT UP*in your own words*

To decide which group is more consistent, I compare _____ because _____.
