

LESSON 2-8 • SESSION 1 • GUIDED NOTES

Finding the Mean

Learning target – I can find the mean of a data set by sharing the total equally among the values. · 6.SP.B.5c

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
mean <i>media</i>	The fair share: add all values, then _____ by how many there are.	$(3 + 5 + 6 + 10) \div 4 = 6$
average <i>promedio</i>	Another _____ for the mean.	the average score
measure of center <i>medida de centro</i>	One number that tells a _____ value of the data.	mean, median
data set <i>conjunto de datos</i>	All the _____ you collected.	8, 15, 11, 6

KEY IDEA*complete each sentence*

- Mean = _____ of the values $\div$ _____ of values.
- Count every value, even a _____.
- The mean lands between the _____ and greatest values.

WORKED EXAMPLE*fill in the blanks as we solve*

Four friends have 3, 5, 6 and 10 stickers. Find the mean.

Step 1 Add: $3 + 5 + 6 + 10 =$ _____**Step 2** Count the values: there are _____.**Step 3** Divide: $24 \div 4 =$ _____. Check: 6 is between 3 and 10.**Answer** The mean is _____ stickers.**YOU TRY***use the example as a model*

1. Find the mean of each data set.

a. 4, 8, 6, 10, 7 _____**b.** 3, 5, 7 _____

2. Five families paid \$18, \$24, \$15, \$21 and \$22 for tickets. Find the mean amount.

*Show your work.***Answer** _____ dollars**SUM IT UP***in your own words**The mean is a fair share because _____.*

LESSON 2-8 • SESSION 2 • GUIDED NOTES

Reaching a Target Mean

Learning target – I can find the value a data set still needs in order to reach a target mean. • 6.SP.B.5c

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
target mean <i>media objetivo</i>	The mean you ____ to reach.	a goal mean of 29
target total <i>total objetivo</i>	Target mean $\times$ number of ____.	$8 \times 4 = 32$
missing value <i>valor faltante</i>	Target total – the sum you ____ have.	$32 - 22 = 10$

KEY IDEA*complete each sentence*

- Work ____: target total = target mean $\times$ number of values.
- Then ____ the sum so far to find the missing value.

WORKED EXAMPLE*fill in the blanks as we solve*

Quiz scores are 6, 7 and 9. What fourth score gives a mean of 8?

Step 1 Count all the scores, including the missing one: ____.**Step 2** Target total: $8 \times 4 =$ ____ . Sum so far: $6 + 7 + 9 = 22$.**Step 3** Subtract: $32 - 22 =$ ____.**Answer** The fourth score is ____ . **Check:** $32 \div 4 = 8$ **YOU TRY***use the example as a model***1.** Fill in each blank.

- a.** Mean 25, 4 values. Total = _____ **b.** Need 72, have 57. Missing = _____

2. Maria scored 85, 90 and 88 on three quizzes. What score on quiz 4 gives a mean of 90?*Show your work.***Answer** _____ points**SUM IT UP***in your own words*

To find a missing value, I first find the ____ because ____.
