

LESSON 3-4 • SESSION 1 • PREREQUISITE PRACTICE A • SKILL 1 OF 2

Plot Points in Quadrant I

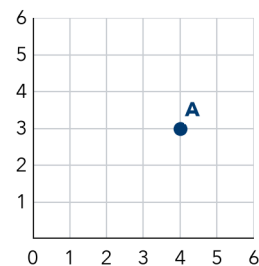

Builds on Grade 5 • 5.G.A.1

TODAY'S LESSON

You will plot points like (2, 6) for 2 hours and 6 miles.

YOU NEED TOPlot a point like (3, 4): go right 3, then up 4. **You will use it in Practice Form A, problems 2 and 5.****STEPS TO FOLLOW***use these same steps on every problem*

- 1** Start at **(0, 0)**.
- 2** Move **right** the first number (x).
- 3** Move **up** the second number (y). Draw a dot.

WATCH ME*the steps in action***Plot point A at (4, 3).****Step 1** Start at (0, 0).**Step 2** Move right 4.**Step 3** Move up 3. Draw a dot. Label it A.**Answer** A is 4 right and 3 up.**TRY IT WITH HELP***fill in each step*

- Plot point B at (2, 5) on the Watch Me grid.

Step 1 Start at _____.**Step 2** Move right _____.**Step 3** Move up _____. Draw a dot.

- Plot point C at (5, 1) on the same grid.

Step 1 Start at _____.**Step 2** Move right _____.**Step 3** Move up _____. Draw a dot.**YOUR TURN***use the steps on your own*

- Write how far right and how far up you move for each point.

a. (3, 7): _____**b.** (6, 2): _____**c.** (0, 4): _____**d.** (5, 0): _____**e.** (1, 6): _____**f.** (4, 4): _____

Read Axis Scales

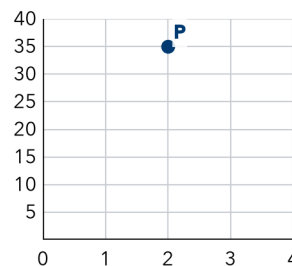

Builds on Grade 5 • 5.G.A.2

TODAY'S LESSON

You will plot Maya's savings on a graph whose y-axis counts by 4.

YOU NEED TORead a skip-count axis, like 7 lines up by 5s is 35. **You will use it in Practice Form A, problem 5.****STEPS TO FOLLOW***use these same steps on every problem*

- 1** Find the **scale**: how much each gridline counts.
- 2** **Count** the gridlines from 0.
- 3** **Multiply**: gridlines $\times$ scale = the value.

WATCH ME*the steps in action***The y-axis counts by 5. Point P is 7 gridlines up.****What is its y-value?****Step 1** The scale is 5.**Step 2** P is 7 gridlines up.**Step 3** $7 \times 5 = 35$.**Answer** 35**TRY IT WITH HELP***fill in each step*

- 4.** The y-axis counts by 10. A point is 6 gridlines up. What is its y-value?

Step 1 The scale is _____.**Step 2** The point is _____ gridlines up.**Step 3** $6 \times 10 =$ _____.

- 5.** The x-axis counts by 2. A point is 4 gridlines right. What is its x-value?

Step 1 The scale is _____.**Step 2** The point is _____ gridlines right.**Step 3** $4 \times 2 =$ _____.**YOUR TURN***use the steps on your own*

- 6.** Find each value.

a. by 5s, 4 lines: ____ **b.** by 10s, 3 lines: ____ **c.** by 25s, 3 lines: ____ **d.** by 4s, 9 lines: ____

READY CHECK*a problem like the one in today's lesson*

- 7.** The y-axis counts by 5. A point is 9 gridlines up. What is its y-value?

A 14**B** 45**C** 9**D** 40**CHECK YOURSELF**
☐ I can do this on my own ☐ I need a little help ☐ I have a question about #____
