

LESSON 3-5 • SESSION 1 • PREREQUISITE PRACTICE B • SKILL 1 OF 2

Scale Ratios to a Target

Builds on Lesson 3-3 Session 2 • 6.RP.A.3a

TODAY'S LESSON

You will scale ratios like 4 : 9 so the first term is 12.

YOU NEED TOScale a ratio to a target, like 3 : 4 to 15 : 20. **You will use it in Practice Form A, problems 1 and 4.****STEPS TO FOLLOW***use these same steps on every problem*

- 1 Divide:** target $\div$ first term = the scale factor.
- 2 Multiply** the second term by the scale factor.
- 3 Write** the new ratio.

WATCH ME*the steps in action***Scale 3 : 4 so the first term is 15.****Step 1** $15 \div 3 = 5$.**Step 2** $4 \times 5 = 20$.**Step 3** The new ratio is 15 : 20.**Answer 15 : 20****TRY IT WITH HELP***fill in each step*

1. Scale 2 : 3 so the first term is 10.

Step 1 $10 \div 2 = \underline{\hspace{2cm}}$.**Step 2** $3 \times 5 = \underline{\hspace{2cm}}$.**Step 3** New ratio: 10 : $\underline{\hspace{2cm}}$

2. Scale 5 : 6 so the first term is 20.

Step 1 $20 \div 5 = \underline{\hspace{2cm}}$.**Step 2** $6 \times 4 = \underline{\hspace{2cm}}$.**Step 3** New ratio: 20 : $\underline{\hspace{2cm}}$ **YOUR TURN***use the steps on your own*

3. Find each missing number.

a. $3 : 5 = 12 : \underline{\hspace{2cm}}$

b. $2 : 7 = 12 : \underline{\hspace{2cm}}$

c. $6 : 5 = 12 : \underline{\hspace{2cm}}$

d. $1 : 9 = 12 : \underline{\hspace{2cm}}$

e. $4 : 3 = 20 : \underline{\hspace{2cm}}$

f. $10 : 3 = 20 : \underline{\hspace{2cm}}$

Interpret Ratio Language

Builds on Lesson 3-1 Session 1 • 6.RP.A.1

TODAY'S LESSON

You will compare 3 cups red to 4 cups blue with 2 cups red to 3 cups blue.

YOU NEED TORead a ratio and match each number to its thing, like red is 3. **You will use it in Practice Form A, problems 2 and 3.****STEPS TO FOLLOW***use these same steps on every problem*

- 1 Name** each part and its number.
- 2 Add** the parts to find the total.
- 3** Write the ratio in the **order** asked.

WATCH ME*the steps in action***A drink uses 2 scoops of powder for every 5 cups of water. Write powder to total.****Step 1** Powder: 2. Water: 5.**Step 2** Total: $2 + 5 = 7$.**Step 3** Powder first, then total: 2 : 7.**Answer 2 : 7****TRY IT WITH HELP***fill in each step***4.** Paint uses 3 cups red to 4 cups blue. Write blue to total.**Step 1** Red: _____. Blue: _____.**Step 2** Total: $3 + 4 =$ _____.**Step 3** Blue to total: _____ : _____**5.** A pitcher has 2 cans of juice to 3 cans of water. Write water to juice.**Step 1** Juice: _____. Water: _____.**Step 2** Total: $2 + 3 =$ _____.**Step 3** Water to juice: _____ : _____**YOUR TURN***use the steps on your own***6.** Trail mix has 4 cups of nuts, 3 cups of raisins and 5 cups of oats. Write each ratio.**a.** nuts to raisins: ____ **b.** oats to nuts: ____ **c.** raisins to oats: ____**d.** nuts to total: ____ **e.** oats to total: ____ **f.** raisins to total: ____**READY CHECK***a problem like the one in today's lesson***7.** A smoothie uses 3 cups of fruit for every 2 cups of yogurt. What is the ratio of fruit to total?**A** 3 : 2**B** 2 : 3**C** 5 : 3**D** 3 : 5**CHECK YOURSELF**
☐ I can do this on my own
 ☐ I need a little help
 ☐ I have a question about #____
