

**LESSON 4-2 • SESSION 1 • GUIDED NOTES****Fractions, Decimals, Percents**

Learning target – I can write the same value as a fraction, a decimal, and a percent. • 6.RP.A.3c

**WORDS TO KNOW***fill in the missing words*

| WORD                                    | WHAT IT MEANS                                             | EXAMPLE                             |
|-----------------------------------------|-----------------------------------------------------------|-------------------------------------|
| <b>percent</b><br><i>por ciento</i>     | A ratio that compares a number to ____.                   | $45\% = 45/100 = 0.45$              |
| <b>equivalent</b><br><i>equivalente</i> | Names the ____ amount in a different way.                 | $3/4 = 0.75 = 75\%$                 |
| <b>hundredths</b><br><i>centésimas</i>  | Parts out of 100; the ____ place after the decimal point. | $0.09 = 9 \text{ hundredths} = 9\%$ |

**KEY IDEA***complete each sentence*

- Fraction to percent: make an equivalent fraction with a denominator of \_\_\_\_.
- Decimal to percent: read the decimal in \_\_\_\_\_, so  $0.4 = 0.40 = 40\%$ .
- Percent to fraction: write the percent over 100, then \_\_\_\_\_.

**WORKED EXAMPLE***fill in the blanks as we solve*

20 students voted for a class color. 7 chose green. Write the green votes as a fraction, a decimal, and a percent.

**Step 1** Fraction, part over whole: \_\_\_\_.

**Step 2**  $20 \times \underline{\hspace{1cm}} = 100$ , so  $7/20 = 35/100$ .

**Step 3**  $35/100 = \underline{\hspace{1cm}}$  as a decimal.

**Answer**  $7/20 = 0.35 = \underline{\hspace{1cm}}$

**YOU TRY***use the example as a model*

1. Write each value as a percent.

a.  $3/5 = \underline{\hspace{1cm}}$

b.  $0.08 = \underline{\hspace{1cm}}$

c.  $0.7 = \underline{\hspace{1cm}}$

2. A tank is 45% full. Write 45% as a decimal and as a fraction in simplest form.

Show your work.

**Decimal, fraction** \_\_\_\_\_

**SUM IT UP***in your own words*

To write a fraction as a percent, I \_\_\_\_ because \_\_\_\_.

---

---

**LESSON 4-2 • SESSION 2 • GUIDED NOTES**

# Compare and Order

Learning target – I can compare and order values written as fractions, decimals, and percents. · 6.RP.A.3c

**WORDS TO KNOW***fill in the missing words*

| WORD                                           | WHAT IT MEANS                                                | EXAMPLE                        |
|------------------------------------------------|--------------------------------------------------------------|--------------------------------|
| <b>common form</b><br><i>forma común</i>       | Every value written the ____ way before you compare.         | 0.7, 3/5, 65% as 70%, 60%, 65% |
| <b>benchmark</b><br><i>punto de referencia</i> | An easy number you know well, used to ____ other numbers.    | 1/2 = 50%                      |
| <b>order</b><br><i>orden</i>                   | To list numbers from ____ to greatest, or greatest to least. | 0.2, 35%, 1/2                  |

**KEY IDEA***complete each sentence*

- To compare a fraction, a decimal and a percent, first write them all as \_\_\_\_\_.
- After you order the percents, write the list with the \_\_\_\_\_ numbers.

**WORKED EXAMPLE***fill in the blanks as we solve*

Order 0.7, 3/5, and 65% from least to greatest.

**Step 1**    0.7 = 0.70 = \_\_\_\_**Step 2**    3/5 = 60/100 = \_\_\_\_**Step 3**    Compare: 60% < 65% < 70%**Answer**    Least to greatest: \_\_\_\_, **65%**, **0.7****YOU TRY***use the example as a model***1.** Write <, >, or = in each blank.

**a.** 0.3 \_\_\_\_ 1/4

**b.** 0.45 \_\_\_\_ 45%

**c.** 7/20 \_\_\_\_ 0.4

**2.** Order 0.62, 3/5, and 61% from least to greatest.*Show your work.***Order** \_\_\_\_\_**SUM IT UP***in your own words*

To order a fraction, a decimal, and a percent, I first \_\_\_\_ because \_\_\_\_.
