

LESSON 4-3 • SESSION 2 • PREREQUISITE PRACTICE B • SKILL 1 OF 2

Estimate with Benchmark Percents

Builds on Lesson 4-3 Session 1 • 6.RP.A.3c

TODAY'S LESSON

You will estimate about 26% of 612 players.

YOU NEED TORound a percent like 26% to a benchmark like 25%, then estimate. **You will use it in Practice Form A, problems 4 and 7.****STEPS TO FOLLOW***use these same steps on every problem*

- 1** Round the percent to the **closest benchmark**: 10%, 25%, 50%, or 75%.
- 2** Round the number to a **friendly** number.
- 3** Find the benchmark **amount**, like 25% of 80 = $80 \div 4$.

WATCH ME*the steps in action***Estimate 49% of 82.****Step 1** 49% is close to 50%.**Step 2** 82 is close to 80.**Step 3** 50% of 80 = $80 \div 2 = 40$.**Answer about 40****TRY IT WITH HELP***fill in each step*

- 1.**
- Estimate 24% of 39.

Step 1 24% is close to ____%.**Step 2** 39 is close to ____.**Step 3** 25% of 40 = $40 \div 4 =$ _____

- 2.**
- Estimate 11% of 302.

Step 1 11% is close to ____%.**Step 2** 302 is close to ____.**Step 3** 10% of 300 = $300 \div 10 =$ _____**YOUR TURN***use the steps on your own*

- 3.**
- Estimate each amount.

a. 52% of 98 is about ____ **b.** 26% of 81 is about ____ **c.** 9% of 61 is about ____**d.** 74% of 41 is about ____ **e.** 48% of 203 is about ____ **f.** 24% of 121 is about ____

Find a Fraction of a Number

Builds on Grade 5 • 5.NF.B.4

TODAY'S LESSONYou will find $\frac{1}{4}$ of 600 to estimate 26% of 612.**YOU NEED TO**Find a fraction of a number, like $\frac{3}{4}$ of 160. **You will use it in Practice Form A, problems 4 and 7.****STEPS TO FOLLOW***use these same steps on every problem*

- 1 Divide** the number by the bottom of the fraction.
- 2 Multiply** that answer by the top of the fraction.
- 3 Check:** the answer should be less than the number.

WATCH ME*the steps in action***Find $\frac{3}{4}$ of 160.****Step 1** $160 \div 4 = 40$.**Step 2** $40 \times 3 = 120$.**Step 3** 120 is less than 160. It makes sense.**Answer** $\frac{3}{4}$ of 160 = 120**TRY IT WITH HELP***fill in each step***4.** Find $\frac{1}{4}$ of 800.**Step 1** $800 \div 4 = \underline{\hspace{2cm}}$ **Step 2** $\underline{\hspace{2cm}} \times 1 = \underline{\hspace{2cm}}$ **Step 3** Is 200 less than 800? $\underline{\hspace{2cm}}$ **5.** Find $\frac{2}{5}$ of 80.**Step 1** $80 \div 5 = \underline{\hspace{2cm}}$ **Step 2** $16 \times 2 = \underline{\hspace{2cm}}$ **Step 3** Is 32 less than 80? $\underline{\hspace{2cm}}$ **YOUR TURN***use the steps on your own***6.** Find each amount.**a.** $\frac{1}{2}$ of 90 = $\underline{\hspace{2cm}}$ **b.** $\frac{1}{4}$ of 120 = $\underline{\hspace{2cm}}$ **c.** $\frac{3}{4}$ of 40 = $\underline{\hspace{2cm}}$ **d.** $\frac{1}{10}$ of 350 = $\underline{\hspace{2cm}}$ **e.** $\frac{2}{5}$ of 50 = $\underline{\hspace{2cm}}$ **f.** $\frac{3}{4}$ of 200 = $\underline{\hspace{2cm}}$ **READY CHECK***a problem like the one in today's lesson***7.** Which is a good estimate of 74% of 158?**A** $\frac{3}{4}$ of 160 = 120**B** $\frac{1}{4}$ of 160 = 40**C** $\frac{1}{2}$ of 160 = 80**D** $74 + 158 = 232$ **CHECK YOURSELF**☐ I can do this on my own☐ I need a little help☐ I have a question about # $\underline{\hspace{1cm}}$
