

LESSON 6-1 • SESSION 1 • PREREQUISITE PRACTICE B • SKILL 1 OF 2

Multiply a Whole by a Fraction

Builds on Grade 5 • 5.NF.B.4a

TODAY'S LESSONYou will find $9 \div 1/3 = 27$. You can check it: $27 \times 1/3 = 9$.**YOU NEED TO**Multiply a whole number by a fraction, like $12 \times 1/4$. **You will use it in Practice Form A, problems 5 and 8.****STEPS TO FOLLOW***use these same steps on every problem*

- 1** Write the whole number **over 1**.
- 2** **Multiply** the tops. Multiply the bottoms.
- 3** **Simplify**. Divide the top by the bottom.

WATCH ME*the steps in action***Find $12 \times 1/4$.****Step 1** $12 = 12/1$.**Step 2** $12/1 \times 1/4 = 12/4$.**Step 3** $12 \div 4 = 3$.**Answer 3****TRY IT WITH HELP***fill in each step***1.** Find $10 \times 1/5$.**Step 1** $10 = \underline{\hspace{2cm}}/1$ **Step 2** $10/1 \times 1/5 = \underline{\hspace{2cm}}/\underline{\hspace{2cm}}$ **Step 3** $\underline{\hspace{2cm}} \div 5 = \underline{\hspace{2cm}}$ **2.** Find $6 \times 2/3$.**Step 1** $6 = \underline{\hspace{2cm}}/1$ **Step 2** $6/1 \times 2/3 = \underline{\hspace{2cm}}/\underline{\hspace{2cm}}$ **Step 3** $\underline{\hspace{2cm}} \div 3 = \underline{\hspace{2cm}}$ **YOUR TURN***use the steps on your own***3.** Multiply. Simplify your answer.

a. $8 \times 1/2 = \underline{\hspace{2cm}}$

b. $15 \times 1/3 = \underline{\hspace{2cm}}$

c. $20 \times 1/4 = \underline{\hspace{2cm}}$

d. $9 \times 2/3 = \underline{\hspace{2cm}}$

e. $10 \times 3/5 = \underline{\hspace{2cm}}$

f. $28 \times 1/4 = \underline{\hspace{2cm}}$

Name the Reciprocal

Builds on Grade 5 • 5.NF.B.4

TODAY'S LESSONYou will change $4 \div 1/10$ into 4×10 . The 10 is the reciprocal of $1/10$.**YOU NEED TO**Flip a fraction to name its reciprocal: $1/4$ becomes $4/1$, or 4. **You will use it in Practice Form A, problems 1 and 8.****STEPS TO FOLLOW***use these same steps on every problem*

- 1** Write the number as a **fraction**. A whole number goes over 1.
- 2** **Flip** it. Swap the top and bottom.
- 3** **Check**: the number times its reciprocal is 1.

WATCH ME*the steps in action***Find the reciprocal of $1/6$.****Step 1** $1/6$ is already a fraction.**Step 2** Flip it: $6/1 = 6$.**Step 3** Check: $1/6 \times 6 = 6/6 = 1$.**Answer 6****TRY IT WITH HELP***fill in each step*

- 4.**
- Find the reciprocal of 3.

Step 1 $3 = \underline{\hspace{1cm}}/1$ **Step 2** Flip it: $\underline{\hspace{1cm}}/\underline{\hspace{1cm}}$ **Step 3** Check: $3 \times \underline{\hspace{1cm}} = 1$

- 5.**
- Find the reciprocal of
- $2/5$
- .

Step 1 The fraction is $\underline{\hspace{1cm}}/\underline{\hspace{1cm}}$.**Step 2** Flip it: $\underline{\hspace{1cm}}/\underline{\hspace{1cm}}$ **Step 3** Check: $2/5 \times 5/2 = \underline{\hspace{1cm}}/10 = 1$ **YOUR TURN***use the steps on your own*

- 6.**
- Write the reciprocal.

a. $1/8$ $\underline{\hspace{1cm}}$ **b.** $1/2$ $\underline{\hspace{1cm}}$ **c.** 7 $\underline{\hspace{1cm}}$ **d.** $3/4$ $\underline{\hspace{1cm}}$ **e.** $1/10$ $\underline{\hspace{1cm}}$ **f.** 5 $\underline{\hspace{1cm}}$ **READY CHECK***a problem like the one in today's lesson*

- 7.**
- Which is the same as
- $4 \div 1/10$
- ?

A $4 \times 1/10$ **B** 4×10 **C** $10 \div 4$ **D** $1/10 \div 4$ **CHECK YOURSELF**☐ I can do this on my own☐ I need a little help☐ I have a question about # $\underline{\hspace{1cm}}$
