

LESSON 6-2 • SESSION 1 • GUIDED NOTES

Dividing a Fraction by a Fraction

Learning target – I can divide a fraction by another fraction using the reciprocal. · 6.NS.A.1

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
reciprocal <i>recíproco</i>	A fraction flipped upside down; the two numbers multiply to make ____.	$2/9$ and $9/2$
dividend <i>dividendo</i>	The amount you ____ with and split into groups.	In $8/9 \div 2/9$, $8/9$ is the dividend
divisor <i>divisor</i>	The size of each group; the number you divide ____.	In $8/9 \div 2/9$, $2/9$ is the divisor

KEY IDEA*complete each sentence*

- To divide by a fraction, multiply by its _____.
- Keep the first fraction, change $\div$ to $\times$, and flip only the _____ fraction.
- Check: quotient $\times$ divisor = _____.

WORKED EXAMPLE*fill in the blanks as we solve*How many $1/8$ -meter strips can be cut from $3/4$ meter of tape?

1 whole

Step 1 Write the division: $3/4 \div$ ____.**Step 2** Multiply by the reciprocal: $3/4 \times$ ____ = $24/4$.**Step 3** Simplify: $24/4 =$ ____.**Answer** ____ strips. **Check:** $6 \times 1/8 = 6/8 = 3/4$.**YOU TRY***use the example as a model***1.** Divide.

a. $3/5 \div 1/5 =$ _____

b. $3/8 \div 3/4 =$ _____

2. Ben has $9/10$ pound of nuts. Each bag holds $3/10$ pound. How many bags can he fill?*Show your work.***Answer** _____ bags**SUM IT UP***in your own words*To divide $2/3 \div 1/6$, I multiply by ____ because ____.

LESSON 6-2 • SESSION 2 • GUIDED NOTES

Dividing with Mixed Numbers

Learning target – I can divide mixed numbers by writing them as improper fractions first. · 6.NS.A.1

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
mixed number <i>número mixto</i>	A _____ number and a fraction written together.	2 1/2
improper fraction <i>fracción impropia</i>	A fraction whose numerator is _____ than or equal to its denominator.	5/2
simplify <i>simplificar</i>	Write the same amount using _____ numbers.	28/14 = 2

KEY IDEA*complete each sentence*

- Before dividing, write each mixed number as an _____ fraction.
- Then multiply by the _____ of the divisor and simplify.
- You cannot flip a mixed number until it is _____ fraction.

WORKED EXAMPLE*fill in the blanks as we solve*

A baker has 3 1/2 cups of flour. Each loaf uses 1 3/4 cups. How many loaves can she make?

Step 1 Convert: $3 \frac{1}{2} = \underline{\hspace{1cm}}$ and $1 \frac{3}{4} = \underline{\hspace{1cm}}$.**Step 2** Multiply by the reciprocal: $\frac{7}{2} \times \underline{\hspace{1cm}} = \frac{28}{14}$.**Step 3** Simplify: $\frac{28}{14} = \underline{\hspace{1cm}}$.**Answer** She can make _____ loaves.**YOU TRY***use the example as a model*

1. Fill in each blank.

a. 2 1/2 as an improper fraction: _____ **b.** $3 \frac{1}{3} \div \frac{2}{3} = \underline{\hspace{1cm}}$

2. Kofi has 3 3/4 cups of rice. Each serving is 3/4 cup. How many servings can he make?

*Show your work.***Answer** _____ servings**SUM IT UP***in your own words*

Before I divide mixed numbers, I _____ because _____.
