UNIT 1 · STANDARD MPP.3

Math is Mine

Lesson 1-1 · Teacher Copy

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes

Level 2 Standard

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can describe the ways we are all doers of math, and compare my math story with a classmate's.

Language Objective: I can tell my math story using the words strength, challenge, and I use math when ____ .

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

doer of math | math story | strength | decompose | estimate

☝️ *Tap any word to see its meaning and a picture.*

1. Anyone who uses mathematical thinking is a _____ _____ _____ .

2. Your history with mathematics — what you have done and felt — is your _____ _____ .

3. Something you already do well and can share with others is a _____ .

4. To break a number into parts that rebuild it exactly is to _____ it.

5. A reasoned answer that is close enough to be useful is an _____ .

Write About the Math

What do you believe are your math strengths, and which area do you most want to grow this year?
¿Cuáles crees que son tus fortalezas en matemáticas, y qué área quieres desarrollar más este año?

Say your answer to a partner first. Then write it, using at least two of these words:

- ☐ **doer of math** — *persona que hace matemáticas*
- ☐ **math story** — *historia matemática*
- ☐ **strength** — *fortaleza*
- ☐ **decompose** — *descomponer*
- ☐ **estimate** — *estimar*

Model: *The book estimates about 80 riders by multiplying 20 cars by about 4 riders per car, without counting every person.* — A strong answer says the 4-riders-per-car is a reasoned guess, not a real count, so the total (about 80) is close enough to be useful. A weak answer just restates '80' with no reasoning about why it's an estimate.

Start

Complete the frames. Use the word bank.
Completa las oraciones. Usa el banco de palabras.

- **Name one math ____ you already have and one area you want to ____ . Then name one thing you learned from a ____ 's math story.**
- **My answer is ____ because ____.**
  Mi respuesta es ____ porque ____.

Build

Write two connected sentences. Use because, so, or but.
Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
  Mi afirmación es ____.

- **My evidence is ____, so ____.**
  Mi evidencia es ____, entonces ____.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- [ ] I answered the question.
- [ ] I used math evidence: numbers, an equation, or a model.
- [ ] I used at least two math words.

Writing Guide — Teacher Copy

- The answer to the math question is correct.
- The evidence is real lesson mathematics (numbers, equation, or model), not restated claim.
- The support level changed the language scaffolding, never the mathematical expectation.

Answer Key & Teacher Guide

1. **Notes 1:** doer of math
2. **Notes 2:** math story
3. **Notes 3:** strength
4. **Notes 4:** decompose
5. **Notes 5:** estimate
6. **Watch for this mistake:** *Believing that 'doing math' only counts when it happens on paper in a classroom.*
7. **Try It 1:**
8. **Try It 2:** B. Because what you believe about yourself shapes how you learn all year — *The lesson's summary says it directly: what we believe about ourselves, about others, and about what we are learning shapes us.*
