UNIT 1 · STANDARD 5.OA.B.3

Math is Finding Patterns

Lesson 1-5 · Teacher Copy

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes

Level 3 Enrichment

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can find patterns and pattern rules, use them to make generalizations, and check my solutions with a table of values.
Language Objective: I can describe a pattern using the words pattern rule, generalization, and 'each number is ____ more than the one before it.'

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

pattern | pattern rule | generalization | table of values | reasonableness

☝️ *Tap any word to see its meaning and a picture.*

Level 3: try the blanks from memory first, then check the bank.

1. Something that repeats or changes in a predictable way is a _____.

2. The instruction for getting from one term to the next is the _____ _____.

3. A statement true for a whole pattern, not just the cases you tried, is a _____.

4. A table listing each step of a pattern in order is a _____ _____ _____.

5. Whether an answer makes sense, checked as you work, is its _____.

Write About the Math

How can pattern rules tell you how many points each player has after the streak — and how can a table of values prove your answer is reasonable?
¿Cómo te pueden decir las reglas de patrón cuántos puntos tiene cada jugador después de la racha — y cómo puede una tabla de valores probar que tu respuesta es razonable?

Say your answer to a partner first. Then write it, using at least two of these words:

- ☐ **pattern** *patrón*
- ☐ **pattern rule** *regla del patrón*
- ☐ **generalization** *generalización*
- ☐ **table of values** *tabla de valores*
- ☐ **reasonableness** *sensatez del resultado*

Model: *The lesson distinguishes patterns that keep going (like coin value scaling) from one-time facts (like the jar's specific total).* — A strong answer explains a pattern applies to any number of coins (it generalizes), while a fact like $53.50 is fixed to this one jar. A weak answer just labels each card without explaining the difference.

Start

Complete the frames. Use the word bank.
Completa las oraciones. Usa el banco de palabras.

- **Player A's pattern rule leads to a final score of ____ points. Player B's pattern rule leads to a final score of ____ points. Creating a ____ of values that checks each step confirms both totals are correct.**
- **My answer is ____ because ____.**
  Mi respuesta es ____ porque ____.

Build

Write two connected sentences. Use because, so, or but.
Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
  Mi afirmación es ____.

- **My evidence is ____, so ____.**
  Mi evidencia es ____, entonces ____.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- [ ] I answered the question.
- [ ] I used math evidence: numbers, an equation, or a model.
- [ ] I used at least two math words.

Writing Guide — Teacher Copy

- The answer to the math question is correct.
- The evidence is real lesson mathematics (numbers, equation, or model), not restated claim.
- The support level changed the language scaffolding, never the mathematical expectation.

Answer Key & Teacher Guide

1. **Notes 1:** pattern
2. **Notes 2:** pattern rule
3. **Notes 3:** generalization
4. **Notes 4:** table of values
5. **Notes 5:** reasonableness
6. **Watch for this mistake:** *Reporting only the points from the streak (20 or 30) and forgetting to add the points each player had before the streak began.*
7. **Try It 1:**
8. **Try It 2:**
