UNIT 10 · STANDARD MPP.3

Math is Everywhere

Lesson 10-1

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes

Level 3 Enrichment

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can find applications of math outside of school — in professions like being a chef, in hobbies like gardening, and around my own house.

Language Objective: I can describe how someone uses math at work using the words plan, calculate, and measure.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

profession · inventory · portion · area · volume

☝️ *Tap any word to see its meaning and a picture.*

Level 3: try the blanks from memory first, then check the bank.

1. A job someone is trained to do, like chef or nurse, is a _____.

2. The supply a business keeps on hand, tracked by counting, is its _____.

3. The measured amount of food served to one person is a _____.

4. The flat space a surface covers, in square units, is its _____.

5. The space something fills, in cubic units, is its _____.

Write About the Math

How is math used in another profession or hobby that matters to you?
¿Cómo se usan las matemáticas en otra profesión o pasatiempo que te importe?

Say your answer to a partner first. Then write it, using at least two of these words:

- ☐ **profession** — *profesión*
- ☐ **inventory** — *inventario*
- ☐ **portion** — *porción*
- ☐ **area** — *área*
- ☐ **volume** — *volumen*

Model: *Area of the planter is 4 × 2 = 8 square feet (how many plants fit); volume is 4 × 2 × 1 = 8 cubic feet (how much soil to buy).* — A strong answer names area (4 × 2 = 8 square feet, a flat surface) and volume (4 × 2 × 1 = 8 cubic feet, a filled space) and explains why one is squared and one is cubed. A weak answer just says 'they use math' without naming either calculation.

Start

Complete the frames. Use the word bank.
Completa las oraciones. Usa el banco de palabras.

- **Think of a profession or hobby you care about. To do it well, that person might ____ amounts or prices, ____ distances or portions precisely, and ____ ahead so the work gets done on schedule.**
- **My answer is ____ because ____.**
  Mi respuesta es ____ porque ____.

Build

Write two connected sentences. Use because, so, or but.
Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
  Mi afirmación es ____.
- **My evidence is ____, so ____.**
  Mi evidencia es ____, entonces ____.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- [ ] I answered the question.
- [ ] I used math evidence: numbers, an equation, or a model.
- [ ] I used at least two math words.
