UNIT 2 · STANDARD 6.DS.5

Represent and Describe Data in a Box Plot

Lesson 2-4

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes Level 2 Standard

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can make and read a box plot to summarize a data set.
Language Objective: I can explain my box plot using the words box plot, median, quartile, and interquartile range.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Box Plot | Median | Quartile | Interquartile Range | Data distribution | Variability | Five-number summary | Whisker | Middle half

☝️ *Tap any word to see its meaning and a picture.*

1. A graph that shows data with a box and whiskers based on the five-number summary is a _____.

2. The middle value of the data, shown as a line inside the box, is the _____.

3. A value that divides the data into four equal parts is a _____.

4. The distance between the first and third quartiles, showing the middle 50% of data, is the _____.

5. The way data values are spread out is the _____.

6 How spread out the data values are is the _____.

7 The minimum, Q1, median, Q3, and maximum together are the _____.

8 The line that reaches from the box to an extreme value is a _____.

9 The box of a box plot covers the _____ of the data.

Write About the Math

Which team is more consistently scoring high? Use the box plot values to support your answer?

¿Qué equipo anota alto de forma más consistente? Usa los valores del diagrama de caja para apoyar tu respuesta?

Say your answer to a partner first. Then write it, using at least two of these words:

- ☐ **Box Plot** — *Diagrama de caja*
- ☐ **Median** — *Mediana*
- ☐ **Quartile** — *Cuartil*
- ☐ **Interquartile Range** — *Rango intercuartílico*
- ☐ **Data distribution** — *Distribución de datos*

Model: *A box plot is built from the minimum, Q1, median, Q3, and maximum.* — Students name the five-number summary (min, Q1, median, Q3, max) and find the median (14) for the 11 ordered scores.

Start

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **Team A's IQR is ____ and Team B's IQR is ____. Team B's middle 50% scores between ____ and ____. The fan is wrong because ____. The box plot shows that Team B is more consistent because its Q1 and median are higher and its IQR (10) is smaller, while ____.**
- **My answer is ____ because ____.**
  Mi respuesta es ____ porque ____.

Build

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
  Mi afirmación es ____.
- **My evidence is ____, so ____.**
  Mi evidencia es ____, entonces ____.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- [ ] I answered the question.
- [ ] I used math evidence: numbers, an equation, or a model.
- [ ] I used at least two math words.
