UNIT 3 · STANDARD 6.AT.3A

Determine Equivalent Ratios Using Graphs

Lesson 3-4

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes Level 3 Enrichment

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can graph the values from a ratio table as points on the coordinate plane.

Language Objective: I can explain my graph using the words coordinate plane, ordered pair, origin, and proportional.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Coordinate plane | Ordered pair | Linear pattern | Proportional | Origin | Ratio table

☝️ *Tap any word to see its meaning and a picture.*

Level 3: try the blanks from memory first, then check the bank.

1 The flat grid formed by a horizontal and a vertical number line is the _____ .

2 A set of two numbers (x, y) that names a point is an _____ .

3 When graphed points form a straight line, they show a _____ .

4 Two quantities that always keep the same ratio are _____ .

5 The point (0, 0) where the two axes meet is the _____ .

6 A table that lists equivalent ratios in rows or columns is a _____ .

Write About the Math

A food truck tracks how many tacos it sells and how much salsa it uses. After recording data for a week, the owner plots the points on a graph and notices they form a straight line. This helps the owner predict exactly how much salsa to prepare for any number of tacos?

Say your answer to a partner first. Then write it, using at least two of these words:

- [ ] **Coordinate plane**
  Plano cartesiano
- [ ] **Ordered pair**
  Par ordenado
- [ ] **Linear pattern**
  Patrón lineal
- [ ] **Proportional**
  Proporcional
- [ ] **Origin**
  Origen

Model: *The points form a straight line, and each sundae adds 2 ounces of sauce.* — Listen for 'straight line through the origin' and the connection that the constant 2-ounce step shows a proportional relationship.

Start

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **Every point on the line has the same ratio — ____ taco to ____ ounces of salsa — so 10 tacos would use ____ ounces.**
- **My answer is ____ because ____.**
  Mi respuesta es ____ porque ____.

Build

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
  Mi afirmación es ____.
- **My evidence is ____, so ____.**

Mi evidencia es ____, entonces ____.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- [ ] I answered the question.
- [ ] I used math evidence: numbers, an equation, or a model.
- [ ] I used at least two math words.
