

Divide Decimals Using an Algorithm

Lesson 2-7

Name: Type your name

Date: Today's date

Class: Class period

TODAY'S OBJECTIVES

Content Objective: I can divide with decimals by making the divisor a whole number first.

Language Objective: I can explain my work using the words dividend, divisor, quotient, and equivalent division.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Dividend

Divisor

Quotient

Decimal Division Algorithm

Equivalent division

Tap any word to see its meaning and a picture.

1

In a division problem, the total amount being divided is the

2

In a division problem, the number of equal groups you divide into is the

3

The answer to a division problem is the

4

The steps that make the divisor whole before you divide are called the

5

Multiplying both the dividend and divisor by the same power of 10 creates an

 that is easier to solve.

Write About the Math

How does decimal division help you figure out how many pieces you can cut?

¿Cómo te ayuda la división de decimales a averiguar cuántas piezas puedes cortar?

Say your answer to a partner first. Then write it, using at least two of these words:

☐ **Dividend**
Dividendo

☐ **Divisor**
Divisor

☐ **Quotient**
Cociente

☐ **Decimal Division Algorithm**
Algoritmo de división decimal

☐ **Equivalent division**
División equivalente

Model: Move both decimal points the same number of places so the value stays equal. — Students rewrite $18.9 \div 6.3$ as $189 \div 63 = 3$, explaining moving both points one place keeps the division equivalent, so 3 pods are filled.

Start

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **I can cut ____ pieces because $16.8 \div 2.4 =$ ____.**
- **My answer is ____ because ____.**
Mi respuesta es ____ porque ____.

Build

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
Mi afirmación es ____.
- **My evidence is ____, so ____.**
Mi evidencia es ____, entonces ____.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

☐ I answered the question.

☐ I used math evidence: numbers, an equation, or a model.

☐ I used at least two math words.
