UNIT 6 • STANDARD 6.NOS.1

Division Expressions with Fractions and Mixed Numbers

Lesson 6-2 • Teacher Copy

Name: Type your name

Date: Today's date

Class: Class period

My Notes

Level 2 Standard

TODAY'S OBJECTIVES

Content Objective: I can divide a fraction by a fraction and divide with mixed numbers by multiplying by the reciprocal.

Language Objective: I can explain the steps using the words reciprocal, improper fraction, mixed number, and simplify.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Divide Fractions

Dividend

Divisor

Reciprocal

Quotient

Simplify

Mixed number

Improper fraction

Tap any word to see what it means and a picture.

1 Keep the first fraction, change $\div$ to $\times$, and flip the .

2 In $\frac{3}{4} \div \frac{1}{2}$, the fraction $\frac{3}{4}$ being divided is the .

3 In $\frac{3}{4} \div \frac{1}{2}$, the fraction $\frac{1}{2}$ we divide by is the .

4 To divide by $\frac{1}{2}$, I multiply by its , which is 2.

5 The answer to a division problem is the .

6 Writing a fraction with smaller numbers that names the same amount, like $\frac{4}{8} = \frac{1}{2}$, is to it.

7 A whole number and a fraction written together is a

 .

8 A fraction whose numerator is at least its denominator is an

 .

Write About the Math

How does dividing fractions help the carpenter?

¿Cómo ayuda dividir fracciones a la carpintera?

Say your answer to a partner first. Then write it, using at least two of these words:

☐ **Divide Fractions**
Dividir fracciones

☐ **Dividend**
Dividendo

☐ **Divisor**
Divisor

☐ **Reciprocal**
Recíproco

☐ **Quotient**
Cociente

Model: *She will get many portions because $1/8$ pound is much smaller than $3/4$ pound.* — Students recognize the divisor $1/8$ is smaller than the dividend $3/4$, so the quotient is greater than 1.

Start

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **The carpenter can cut ____ pieces because $5/6 \div 1/12 =$ ____.**
- **My answer is ____ because ____.**

Mi respuesta es ____ porque ____.

Build

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
Mi afirmación es ____.
- **My evidence is ____, so ____.**
Mi evidencia es ____, entonces ____.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

☐ I answered the question.

☐ I used math evidence: numbers, an equation, or a model.

☐ I used at least two math words.

Writing Guide — Teacher Copy

- The answer to the math question is correct.
- The evidence is real lesson mathematics (numbers, equation, or model), not restated claim.
- The support level changed the language scaffolding, never the mathematical expectation.

Answer Key & Teacher Guide

1. **Notes 1:** Divide Fractions
2. **Notes 2:** Dividend
3. **Notes 3:** Divisor
4. **Notes 4:** Reciprocal
5. **Notes 5:** Quotient
6. **Notes 6:** Simplify
7. **Notes 7:** Mixed number
8. **Notes 8:** Improper fraction
9. **Watch for this mistake:** *A common mistake in Divide Fractions is flipping the wrong fraction: students flip the dividend (the first fraction) instead of the divisor (the second fraction). For example, solving $3/4 \div 5/8$ by flipping $3/4$ to $4/3$ and keeping $5/8$ gives $4/3 \times 5/8 = 20/24 = 5/6$ — but only the divisor gets flipped. Keep $3/4$, change $\div$ to $\times$, and flip only the divisor $5/8$ to its reciprocal $8/5$: $3/4 \times 8/5 = 24/20 = 6/5$. Before you submit, check that the fraction you kept (the dividend) is still facing the same way it started.*
10. **Try It 1:** A. $4 - (2/3) \div (1/6) = (2/3) \times (6/1) = 12/3 = 4$. The dial unlocks at 4.
11. **Try It 2:** A. $3/2 - (3/4) \div (1/2) = (3/4) \times (2/1) = 6/4 = 3/2$. The keypad accepts $3/2$.
