

# Write and Evaluate Algebraic Expressions

Lesson 6-5

**Name:**

**Date:**

**Class:**

---

## TODAY'S OBJECTIVES

**Content Objective:** I can write an algebraic expression for a real situation and evaluate it for a given value of the variable.

**Language Objective:** I can explain my expression using the words variable, term, coefficient, constant, substitute, and evaluate.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

## WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Write Algebraic Expressions

Variable

Algebraic Expression

Coefficient

Constant

Like terms

Substitute

Evaluate

Tap any word to see what it means and a picture.

1

Turn the words into numbers, operations and a .

2

A letter that stands for an unknown number is a .

3

A math phrase with variables, numbers, and operations but no equal sign is an .

4

The number multiplied by a variable, like the 7 in  $7n$ , is the .

5

A term that is just a number and never changes, like the 5 in  $3x + 5$ , is a .

6 Terms with the same variable part are  .

7 Replace the variable with a given number before you  
 the expression.

8 To put numbers in for the letters and work out the value is to  
 .

## Write About the Math

**Write an expression for the total cost. What does each part of the expression represent?**

*Escribe una expresión para el costo total. ¿Qué representa cada parte de la expresión?*

Say your answer to a partner first. Then write it, using at least two of these words:

☐ **Write Algebraic Expressions**

*Escribir expresiones algebraicas*

☐ **Variable**  
*Variable*

☐ **Algebraic Expression**  
*Expresión algebraica*

☐ **Coefficient**  
*Coeficiente*

☐ **Constant**  
*Constante*

**Model:** Key words name the operation, and 'less than' reverses the order. — A strong answer matches key words to operations (sum/more than = add, less than = subtract, product = multiply) and explains '12 less than g' starts with g, giving  $g - 12$ .

### Start

Complete the frames. Use the word bank.

*Completa las oraciones. Usa el banco de palabras.*

- **The total cost is** \_\_\_\_ **h. The** \_\_\_\_ **represents the** \_\_\_\_ **and** \_\_\_\_ **h represents the** \_\_\_\_.
- **My answer is** \_\_\_\_ **because** \_\_\_\_.

*Mi respuesta es* \_\_\_\_ *porque* \_\_\_\_.

---

---

### Build

Write two connected sentences. Use because, so, or but.

*Escribe dos oraciones conectadas. Usa porque, entonces o pero.*

- **My claim is** \_\_\_\_.
- **My evidence is** \_\_\_\_, **so** \_\_\_\_.

*Mi afirmación es* \_\_\_\_.

*Mi evidencia es* \_\_\_\_, *entonces* \_\_\_\_.

---

---

---

### Explain

Write a claim, give math evidence, and explain your reasoning.

*Escribe una afirmación, da evidencia matemática y explica tu razonamiento.*

---

---

---

---

---

☐ I answered the question.

☐ I used math evidence: numbers, an equation, or a model.

☐ I used at least two math words.
