

# Math is Finding Patterns

Lesson 1-5

**Name:**

**Date:**

**Class:**

---

## TODAY'S OBJECTIVES

**Content Objective:** I can find patterns and pattern rules, use them to make generalizations, and check my solutions with a table of values.

**Language Objective:** I can describe a pattern using the words pattern rule, generalization, and 'each number is \_\_\_\_ more than the one before it.'

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

**Fill in each blank as we go. Use the Word Bank to help you.**

## WORD BANK — FILL EACH BLANK WITH THE BEST WORD

pattern

pattern rule

generalization

table of values

reasonableness

Tap any word to see its meaning and a picture.

Level 3: try the blanks from memory first, then check the bank.

**1** Something that repeats or changes in a predictable way is a

**2** The instruction for getting from one term to the next is the

**3** A statement true for a whole pattern, not just the cases you tried, is a

**4** A table listing each step of a pattern in order is a

**5** Whether an answer makes sense, checked as you work, is its

## Write About the Math

**How can pattern rules tell you how many points each player has after the streak — and how can a table of values prove your answer is reasonable?**

*¿Cómo te pueden decir las reglas de patrón cuántos puntos tiene cada jugador después de la racha — y cómo puede una tabla de valores probar que tu respuesta es razonable?*

Say your answer to a partner first. Then write it, using at least two of these words:

☐ **pattern**  
*patrón*

☐ **pattern rule**  
*regla del patrón*

☐ **generalization**  
*generalización*

☐ **table of values**  
*tabla de valores*

☐ **reasonableness**  
*sensatez del resultado*

**Model:** *The lesson distinguishes patterns that keep going (like coin value scaling) from one-time facts (like the jar's specific total). — A strong answer explains a pattern applies to any number of coins (it generalizes), while a fact like \$53.50 is fixed to this one jar. A weak answer just labels each card without explaining the difference.*

### Start

Complete the frames. Use the word bank.

*Completa las oraciones. Usa el banco de palabras.*

- **Player A's pattern rule leads to a final score of \_\_\_\_ points. Player B's pattern rule leads to a final score of \_\_\_\_ points. Creating a \_\_\_\_ of values that checks each step confirms both totals are correct.**
  - **My answer is \_\_\_\_ because \_\_\_\_.**  
*Mi respuesta es \_\_\_\_ porque \_\_\_\_.*
- 
- 

### Build

Write two connected sentences. Use because, so, or but.

*Escribe dos oraciones conectadas. Usa porque, entonces o pero.*

- **My claim is \_\_\_\_.**  
*Mi afirmación es \_\_\_\_.*

- **My evidence is** \_\_\_\_, **so** \_\_\_\_.

*Mi evidencia es* \_\_\_\_, *entonces* \_\_\_\_.

---

---

---

---

## Explain

Write a claim, give math evidence, and explain your reasoning.

*Escribe una afirmación, da evidencia matemática y explica tu razonamiento.*

---

---

---

---

---

☐ I answered the question.

☐ I used math evidence: numbers, an equation, or a model.

☐ I used at least two math words.
