

Math is Finding Patterns

Lesson 1-5

Name:

Date:

Class:

My Notes

Level 2 Standard

TODAY'S OBJECTIVES

Content Objective: I can find patterns and pattern rules, use them to make generalizations, and check my solutions with a table of values.

Language Objective: I can describe a pattern using the words pattern rule, generalization, and 'each number is ____ more than the one before it.'

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

pattern

pattern rule

generalization

table of values

reasonableness

Tap any word to see its meaning and a picture.

1

Something that repeats or changes in a predictable way is a

2

The instruction for getting from one term to the next is the

3

A statement true for a whole pattern, not just the cases you tried, is a

4

A table listing each step of a pattern in order is a

5

Whether an answer makes sense, checked as you work, is its

Write About the Math

How can pattern rules tell you how many points each player has after the streak — and how can a table of values prove your answer is reasonable?

¿Cómo te pueden decir las reglas de patrón cuántos puntos tiene cada jugador después de la racha — y cómo puede una tabla de valores probar que tu respuesta es razonable?

Say your answer to a partner first. Then write it, using at least two of these words:

☐ **pattern**
patrón

☐ **pattern rule**
regla del patrón

☐ **generalization**
generalización

☐ **table of values**
tabla de valores

☐ **reasonableness**
sensatez del resultado

Model: The lesson distinguishes patterns that keep going (like coin value scaling) from one-time facts (like the jar's specific total). — A strong answer explains a pattern applies to any number of coins (it generalizes), while a fact like \$53.50 is fixed to this one jar. A weak answer just labels each card without explaining the difference.

Start

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **Player A's pattern rule leads to a final score of ____ points. Player B's pattern rule leads to a final score of ____ points. Creating a ____ of values that checks each step confirms both totals are correct.**
 - **My answer is ____ because ____.**
Mi respuesta es ____ porque ____.
-
-

Build

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
Mi afirmación es ____.

- **My evidence is** ____, **so** ____.

Mi evidencia es ____, *entonces* ____.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

☐ I answered the question.

☐ I used math evidence: numbers, an equation, or a model.

☐ I used at least two math words.
