

# Generate Equivalent Expressions

Lesson 6-8

**Name:**

**Date:**

**Class:**

---

## My Notes

Level 2 Standard

### TODAY'S OBJECTIVES

**Content Objective:** I can use the commutative, associative, and identity properties to rewrite expressions.

**Language Objective:** I can explain my reasoning using the words commutative property, associative property, and identity property.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

**Fill in each blank as we go. Use the Word Bank to help you.**

### WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Properties of Operations

Commutative Property

Associative Property

Identity Property

Property

Distributive Property

Tap any word to see its meaning and a picture.

1

Rules that let you reorder or regroup without changing the

.

2

The rule that order does not change a sum or product, like  $a + b = b + a$ , is the

.

3

The rule that grouping does not change a sum or product, like  $(a + b) + c = a + (b + c)$ , is the  .

4

The rule that adding 0 or multiplying by 1 keeps a number the same is the

.

5

A rule that is always true in math is a  .

- 6 The rule that lets you multiply a number across a sum, like  $a(b + c) = a \times b + a \times c$ , is the .

## Write About the Math

**What properties did the engineer use, and why does rearranging make the calculation easier?**

*¿Qué propiedades usó la ingeniera, y por qué reacomodar hace más fácil el cálculo?*

Say your answer to a partner first. Then write it, using at least two of these words:

☐ **Properties of Operations**

*Propiedades de las operaciones*

☐ **Commutative Property**

*Propiedad conmutativa*

☐ **Associative Property**

*Propiedad asociativa*

☐ **Identity Property**

*Propiedad de identidad*

☐ **Property**

*Propiedad*

**Model:** *The commutative property lets you change the order of a sum without changing the total. — Students name the commutative property and explain that  $3 + 5 + 2$  gives 10 in any order because reordering addends does not change the sum.*

### Start

Complete the frames. Use the word bank.

*Completa las oraciones. Usa el banco de palabras.*

- The engineer used the \_\_\_\_ property to change the \_\_\_\_ and the \_\_\_\_ property to change the \_\_\_\_\_. This makes it easier because  $4 \times 25 =$  \_\_\_\_, which is a friendly number to multiply by.
- My answer is \_\_\_\_ because \_\_\_\_.

*Mi respuesta es \_\_\_\_ porque \_\_\_\_.*

---

---

---

---

### Build

Write two connected sentences. Use because, so, or but.

*Escribe dos oraciones conectadas. Usa porque, entonces o pero.*

- My claim is \_\_\_\_.
- My evidence is \_\_\_\_, so \_\_\_\_.

*Mi afirmación es \_\_\_\_.*

*Mi evidencia es \_\_\_\_\_, entonces \_\_\_\_\_.*

---

---

---

### **Explain**

Write a claim, give math evidence, and explain your reasoning.

*Escribe una afirmación, da evidencia matemática y explica tu razonamiento.*

---

---

---

☐ I answered the question.

☐ I used math evidence: numbers, an equation, or a model.

☐ I used at least two math words.
